About

Who We Are

DAEJOO PET FOODS is a comprehensive pet care brand,
deriving from the extensive history
and technical expertise of DAEJOO Inc.

DAEJOO Inc.

DAEJOO Inc. was born from the Yesan Farm Corporation, which began its journey in 1962 with the production of animal food. Since then, it has evolved into a leading pet food company in the domestic market.

1962

2023

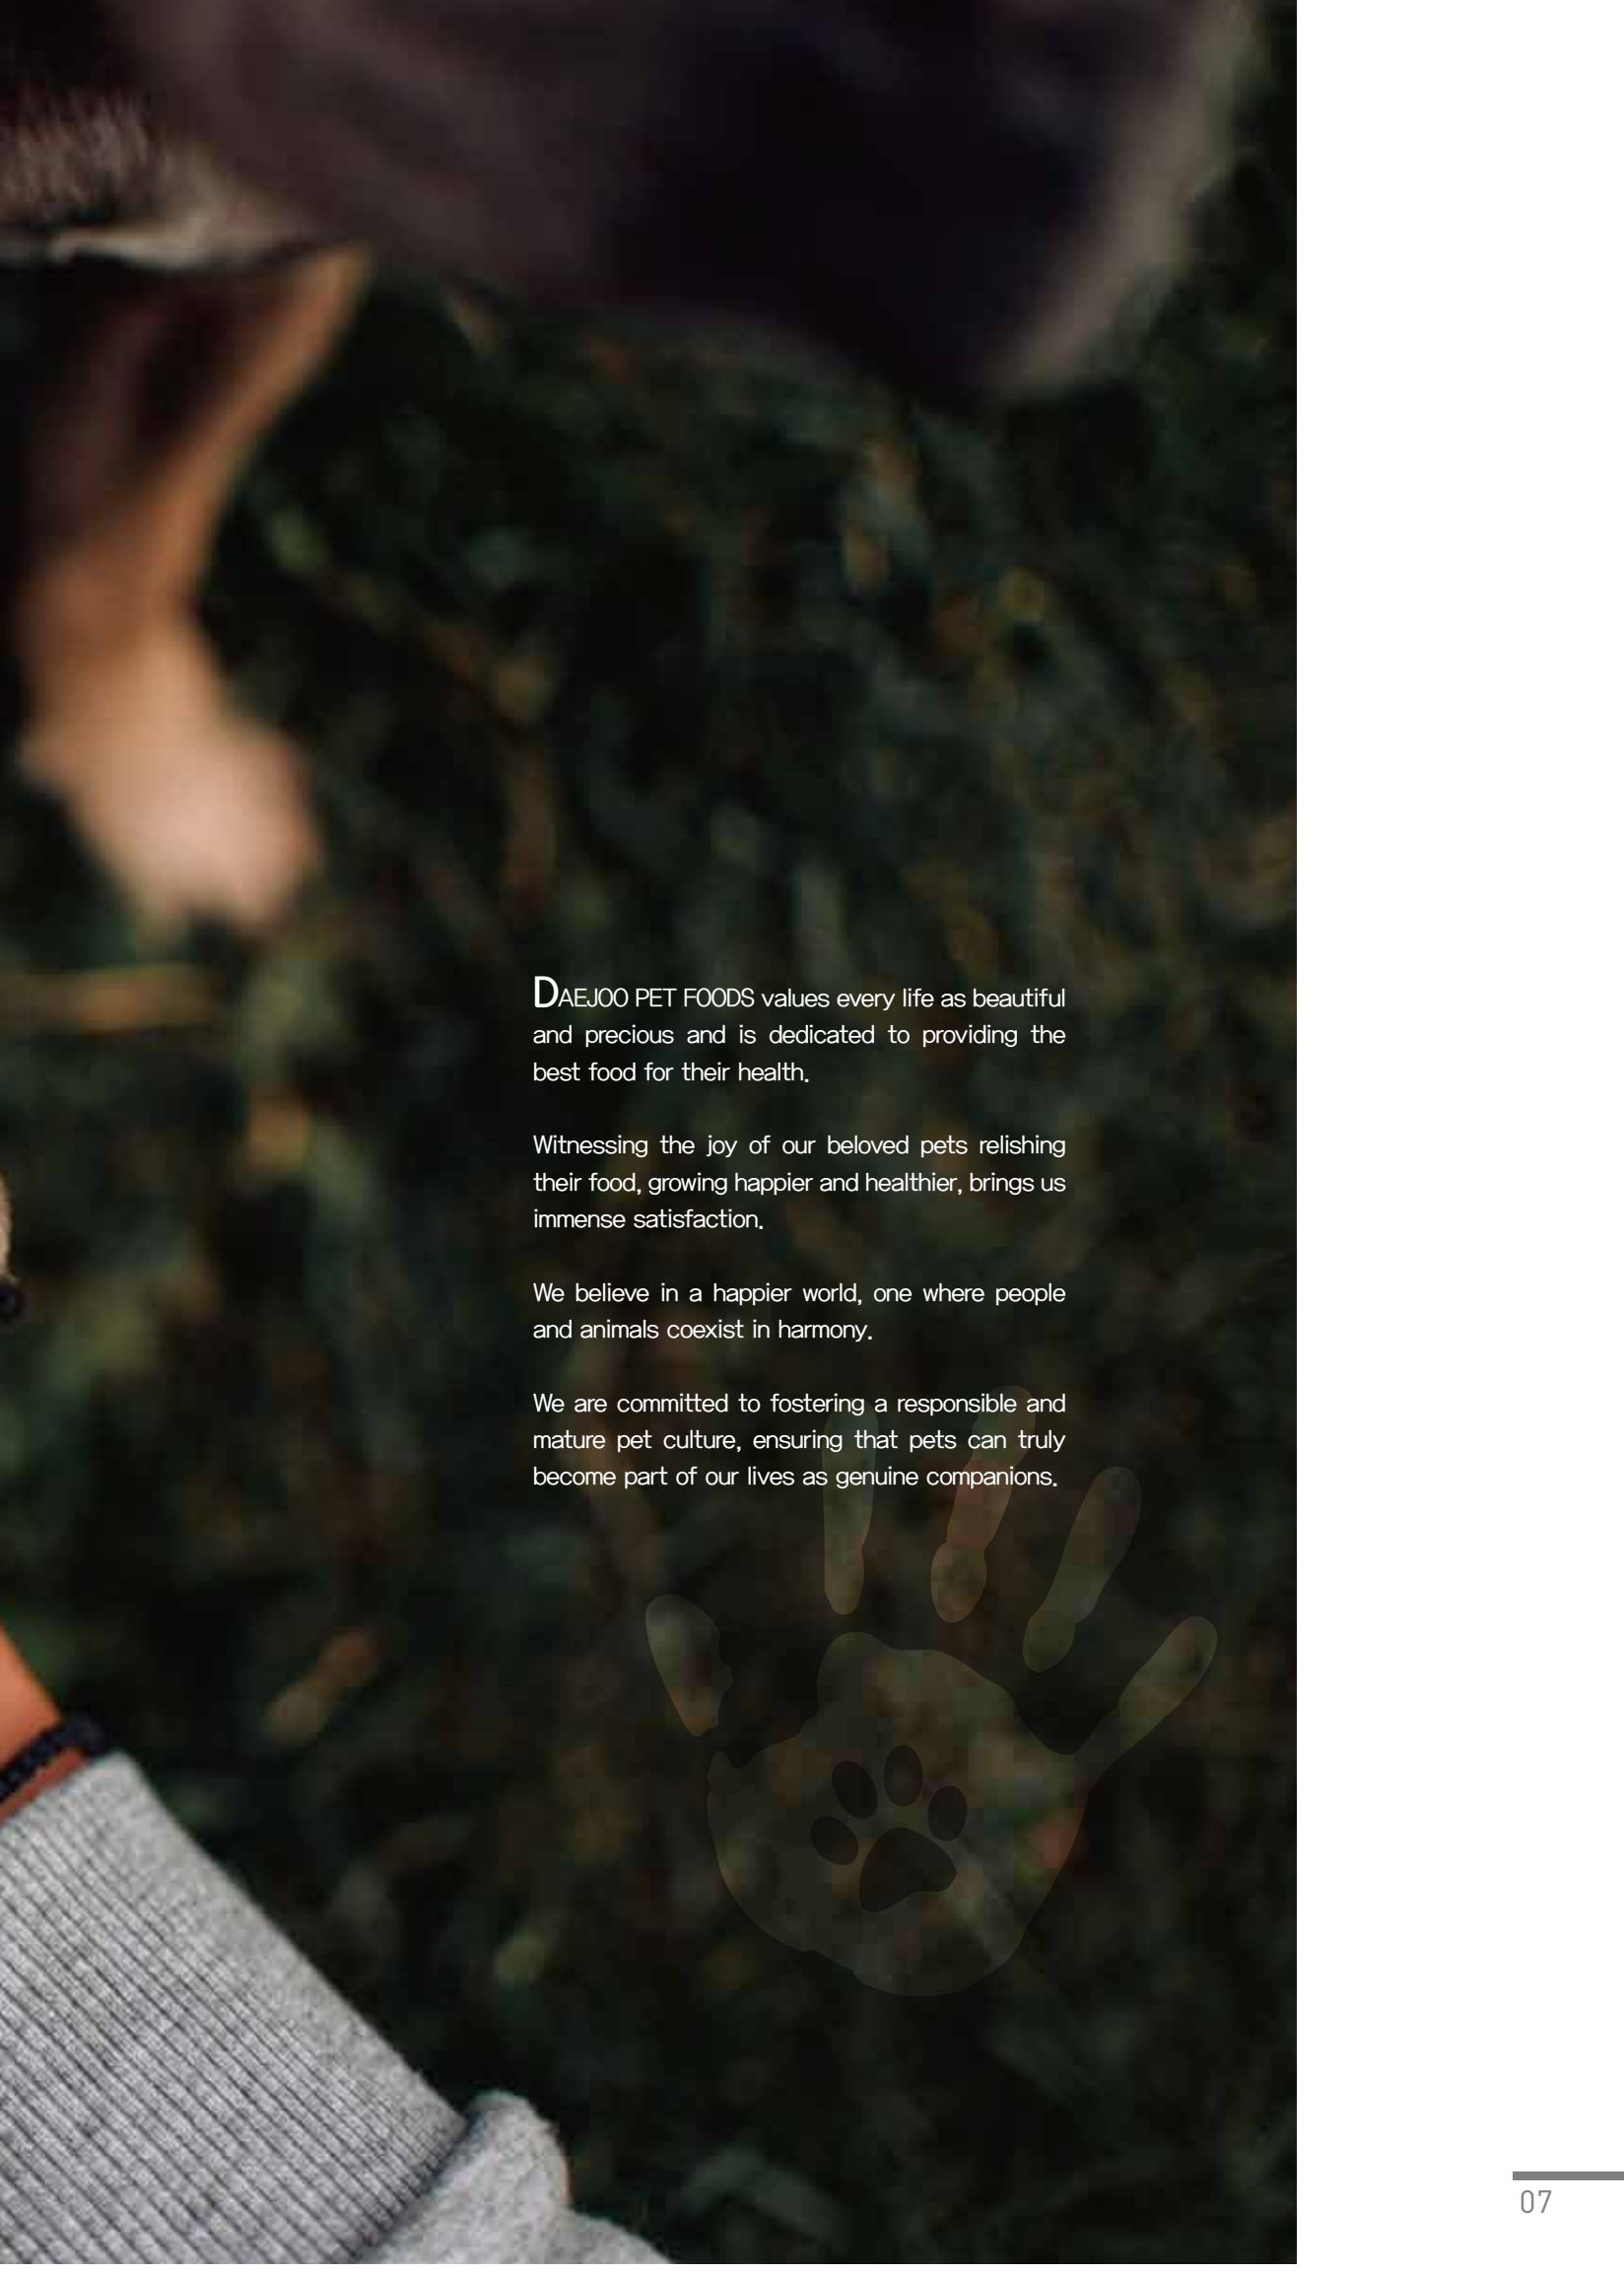

DAEJOO PET FOODS

At DAEJOO PET FOODS, we value every life as beautiful and precious, and are committed to nurturing pets as genuine companions.

Our Vision

Creating a happier world
through the companionship
of people and animals

DAEJOO PET FOODS values every life as beautiful and precious and is dedicated to providing the best food for their health.

Witnessing the joy of our beloved pets relishing their food, growing happier and healthier, brings us immense satisfaction.

We believe in a happier world, one where people and animals coexist in harmony.

We are committed to fostering a responsible and mature pet culture, ensuring that pets can truly become part of our lives as genuine companions.

DAEJOO PET FOODS Plant

Preserving Fresh Ingredients

We hygienically and securely store fresh meat, fruits, vegetables, etc., in large-scale freezing/refrigeration/thawing facilities.

Comprehensive Quality Verification System

Our Quality Control (QC) team conducts a variety of tests, including toxic kit inspections, NIR component checks, aerobic plate count tests, and moisture activity analyses.

Clean Air Circulation

Our plant is designed with an optimal ventilation system to minimize contamination risk

Rigorous Freshness Control

After production, we manage our products under a strict first-in, first-out system to ensure the freshness of the products dispatched.

World's Largest Chainvey System

Our system is the largest worldwide, preventing exposure of raw materials and products to external conditions during production and handling.

HACCP / ISO9001 Certification

Our products are manufactured in our own factories, which are certified with HACCP and ISO9001, ensuring thorough hygiene checks and quality tests.

9-FREE

Our products are "9-FREE", meaning they do not contain BHA, BHT, ethoxyquin, antifungal agents, artificial flavorings, colorings, antibiotics, pesticides, or hormone additives.

DAEJOO's Pride

DAEJOO PET FOODS

takes pride in strictly and cleanly producing pet food
in compliance with international and domestic standards,
thereby ensuring healthy pet food.

All DAEJOO PET FOODS team members

strive every day to create nutritious pet food with the mindset that their own families would consume it.

* Analysis is conducted per gram in units of 1 million, not 1 billion.

The name ALLIVE encapsulates the fact that the **1 billion** probiotics present in ALLIVE survive their journey to the gut, with a survival rate exceeding **90%.**

Intestinal health which is the core to immunity! The entire ALLIVE line products contain 1 billion Bacillus subtilis, a probiotic for intestinal health.

01 Synbiotics

Synbiotics are third-generation probiotics that are more effective for gut health than single probiotics, as they colonize the gut more effectively and promote the proliferation of beneficial bacteria. All ALLIVE products contain synbiotics.

02 Bacillus Subtilis Immuno Formula

The ALLIVE formula includes the robust probiotic 'Bacillus Subtilis' and 'Prebiotics', which amplify the effect of the probiotics, helping to form 'Immunoglobulin(SLG)' and strengthening both gut health and immunity.

03 Includes Fenugreek and Enzymes

Our formula contains fenugreek and enzymes, aiding in reducing fecal odor, improving blood sugar and cholesterol levels, preventing obesity, and the saponin in horseradish helps to enhance immunity.

* Fenugreek is a health functional food of GRAS grade, recognized by the FDA.

04 Efficacy of ALLIVE for gut Health

Benefits of 1 Billion Bacillus Subtilis

Adding 1 billion Bacillus Subtilis to pet food results in improved fecal quality, enhanced digestion of fats and carbohydrates, potentially enables greater utilization of the energy in the food, and increases fecal SCFA, contributing to the gut health of pets.

Figure 4: The FFA also showed a higher apparent digestibility of fat ($P < 0.001$) and NFE ($P < 0.001$) compared to control dogs. Dog food supplemented with Calsporin® at 1×10^8 CFU/kg improved fecal quality, enhanced fat and carbohydrate digestibility, and contributed to the gut health of dogs by reducing gas emission and increasing SCFA content.

Schauf, S., Nakamura, and C. Castrillo, 'Effect of Calsporin® (Bacillus subtilis C-3102) addition to the diet on fecal quality and nutrient digestibility in healthy adult dogs', Journal of Applied Animal Nutrition 7 (2019)

Lactobacillus Plantarum Benefits

Lactobacillus Plantarum significantly increases the level of Lactobacillus and SCFA in the feces, contributing positively to overall intestinal health. (Summary)

Fig. 4: In both breeds when the probiotic was administered (Figure 4: The FFA also showed a higher apparent digestibility of fat ($P < 0.001$) and NFE ($P < 0.001$) compared to control dogs. Dog food supplemented with Calsporin® at 1×10^8 CFU/kg improved fecal quality, enhanced fat and carbohydrate digestibility, and contributed to the gut health of dogs by reducing gas emission and increasing SCFA content.)

Fernández, Leñides, et al, 'Characterization of Lactobacillus rhamnosus MP01 and Lactobacillus plantarum MP02 and assessment of their potential for the prevention of gastrointestinal infections in an experimental canine model', Frontiers in microbiology (2019): 1117.

SCFA*: Fatty acid produced in the large intestine, used as an energy source
