# Professionalism, Efficiency, Rigor, Innovation

#### Conveying Product Value through Packaging

#### **Company Introduction**

MXL Packing is a leading tin box manufacturer based in Huangpu Town, Zhongshan City, Guangdong Province, China. With a professional and efficient team, rigorous management, and advanced equipment, we are dedicated to the development and design of tin boxes, striving to provide creative packaging and brand empowerment for our clients, offering customized and diversified production services. Our commitment is to continually innovate and enhance the added value of products for our customers.

After years of continuous exploration, practice, and innovation, MXL Packing has transformed the traditional manual production mode into a unique and sophisticated fully automated production model. Our workshop adopts a dust-free environment, incorporating high-precision automatic tinplate cutting machines, as well as fully automated robotic arms. The entire manufacturing process is clean, safe, highly precise, and of high quality, ensuring efficient services for our customers.

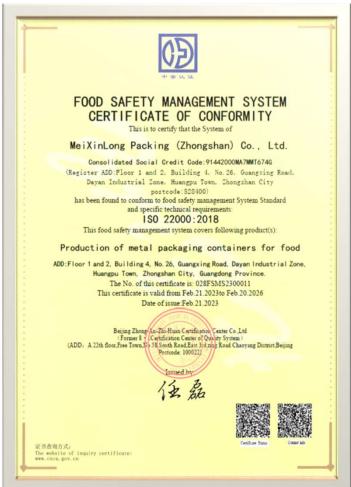

## ISO 22000:2018 FOOD SAFETY MANAGEMEN SYSTEM

MXL Packing is certified under the Food Safety Management System, with all raw materials accompanied by MSDS. We regularly sample our tin boxes and submit them for national food contact material testing to ensure our tins meet the required standards for Direct Food Contact.

## Sedex-Pillar 4-7.0

We are steadfastly committed to establishing ethical and responsible supply chain standards, dedicated to the transparency, sustainability, and social responsibility of our supply chain.

Our commitment to customers and partners: We not only prioritize high-quality products but also emphasize ethical and sustainable practices throughout the supply chain.

## **OUR SERVICES**

#### **Innovative Packaging Design**

Bridge the gap between innovation and manufacturing, and explore new markets together with you. Design is not just about beauty but also about conveying the unique story of each brand!

#### **Mold & Technology**

Mold masters ,each with over 20 years of industry experience, ensure the quality of molds and the production of high-quality tin boxes. With a core focus on high quality and advanced technology, we consistently meet the everevolving demands for innovative tin packaging, satisfying our customers needs.

#### **Collaborative Partnership**

Deeply cultivating and understanding industry trends and material dynamics to ensure that our tin boxes not only meet customer demands but also remain competitive. Customer satisfaction, employee contentment, partner contentment, and societal fulfillment — together, we create the future!

R&D&Design Team

Elite Management **Technical Strength** 

Quality Management Collaboration System

#### Professional, Efficient, Rigorous

Our company has a professional and efficient management team with rigorous management practices. Focused on customer needs, we provide safe and reliable services, continually creating maximum value for our clients!

#### **Quality Philosophy**

Output is efficiency, quality is reputation. We pursue efficiency, but even more so, a good reputation. Building a quality-assured tin box factory to provide customers with safer and more reliable tin boxes!

## **OUR ADVANTAGES**

ISO 22000:2018+SEDEX P4-ENSURING FOOD SAFETY AND SOCIAL ETHICS

OVER 20 FULLY AUTOMATIC HIGH-SPEED TIN MAKING AND TINPLATE CUTTING LINES

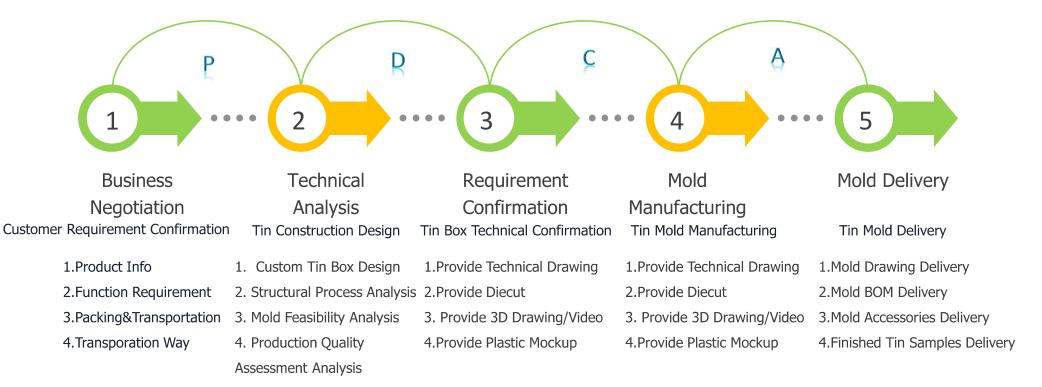

TIN PRODUCTION IS CARRIED OUT IN DUST-FREE WORKSHOP

Catering to creative packaging, brand empowerment, graphic design, 3D rendering displays, sales, and customized production, MXL Packing is driven by a professional, efficient team, rigorous management, and state-of-the-art equipment. Our tin production takes place in a cleanroom environment, supported by high-precision, fully automated tinplate cutting and punching lines, featuring automated robotic arms. This ensures our tin production in a clean, safe, high-precision, high-quality environment, resulting in swift and efficient on-time order deliveries. With a daily output of over 500,000 tin boxes, our annual capacity reaches 150 million tins.

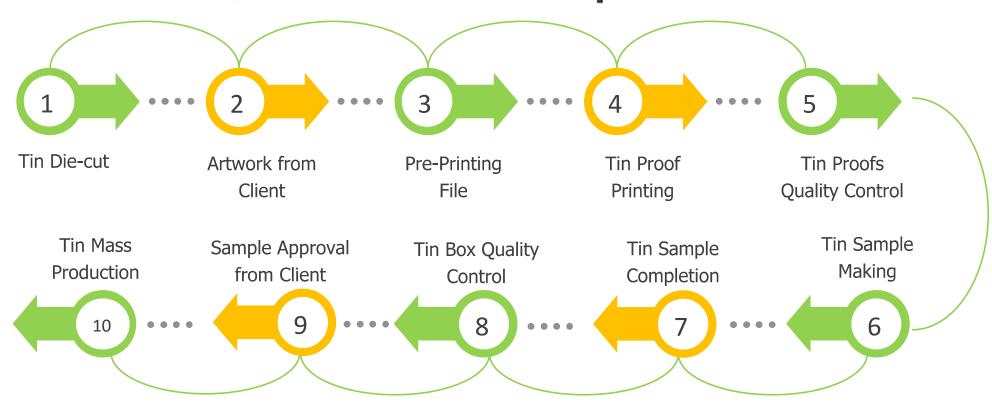

#### **Product Development Process**

### **Pre-Production Tin Samples**

#### **Tinplate-Raw Material**

Tinplate (ETP): Tin-plated from thin cold-rolled steel sheets

Thicknes: 0.15~0.5mm; Width: 700~1050mm

The length can be cut according to the layout of different

box shapes.

Temper:

Single cold rolling: T1, T2, T2.5, T3, T4, T5.

Double cold rolling: DR8, DR9, DR10.

Tin coating:  $1.1\sim5.6$ (g/m²)

Surface: bright, rough, silver, matte

Tins that come into direct contact with the food inside typically use the electrolytic tinplate with a temper hardness of T2.5 and a tin coating weight of 2.8/2.8. All tin boxes comply with standards such as FDA, EN71, REACH, and analytical reports for the raw material-tinplate can be provided.

#### Welcome To MeiXinLong Packing(Zhongshan)CO.,Ltd

#### **Ink&Coating:Toyo Ink-Food Grade**

**Toyo Ink**, established in 1988, is primarily engaged in the research, development, production, and sales of metal printing inks, coatings, and adhesives for lamination. It is a benchmark representative enterprise invested by Japan's Toyo Ink SC Corporation. The inks and coatings can meet the requirements for low pollution, non-toxicity, and high-temperature cooking for food applications. Regular submission of testing reports for ink and coating is ensured.

#### **Tinplate Printing**

The primary advantages of Fuji PRIMEX-P453 printing machine from Japan include stable ink performance, high registration accuracy, and superior print quality.

Maximum Printing Area: 1135x945mm; Printing Tinplate Thickness: 0.12~0.4mm; Printing Production Speed: 100 sheets/minute - Maximum Capacity.

Our printing experts conduct a detailed analysis and breakdown of the client's design drafts, examining the printing processes involved and performing onsite color calibration. After the completion of tinplate printing and ensuring that the quality inspection meets the standards, the printed tinplate is then accepted into the warehouse and proceeds to the cutting process.

All personnel entering the dust-free workshop must wear dust-free suits, dust-free caps, dust-free shoes, earplugs, and masks, and undergo cleaning and disinfection procedures.
