## THAI WISDOM AND A MILLION COCONUT STORIES TOLD THROUGH OUR PRODUCTS

---

Coconut has been an integral part of Thai culture for generations, providing us with sustenance, healing properties, shelter, and vitality. Through our deep-rooted connection with coconuts, we have not only survived but thrived. This has led to the development of Thai wisdom and local knowledge that transforms the humble coconut into something extraordinary.

Today, we at Millico continue to uphold these traditions by infusing our products with the same expertise and care that has been passed down through generations. As proud descendants of coconut farmers, we leverage our local knowledge to ensure that our coconuts are consistently aromatic, sweet, and fragrant.

While we honor our traditional methods of cultivation and harvesting, we also prioritize quality at every step of the process. From hand-selecting each coconut to meticulously packing them for our consumers, we guarantee that our products reach you in their prime condition.

Millico's product range is of something special, tasty and easy to use, most of which is EU organic-certified by Soil Association UK, making them suitable for vegans and individuals who are health-conscious.

WE DO OUR BUSINESS BASED ON THESE FUNDAMENTAL PRINCIPLES.

We maintain the highest standards in every aspect of our workflow, from planting, harvesting, processing, shipment and storage.

Our products are carbon neutral, and we deal directly with families of the coconut producer to ensure fair trade. There is little to no waste during the production as we use every part of the coconut.

We minimise the use of plastic on our packaging, opting for a greener choice. Where plastic is needed, we ensure it is recycled to reduce its impact on the world's environment.
