

Since
1920

Being founded in 1920 by the businessman Mr Ali Eris of Fatsa province, the company's initial reputation was for grain trade in the domestic market. In 1950's, representing the second generation, Mr Ali Eris the son, gained significant success by investing in hazelnut business and started exporting the product. In 1974, Eris invested in the flour milling industry which constitutes the core business of the company today. Since day one, Eris Flour Mills have been manufacturing and supplying quality wheat flour. The company today operates with 2.300 ton/daily grinding capacity, reaching more than 50 countries in 5 continents as well as supplying the domestic market in both retail and industrial

About Us

channel, making Eris one of the pioneers in the industry. In 2013, Eris added a new product to its portfolio by introducing Turkey's first national Instant Noodle brand; Nudo. This was the result of more than 2 year R&D process led by expert food engineers and the product is entirely natural and additive free. The content of NUDO is simply natural as it contains only wheat flour, vegetable oil, salt and spices. No MSG has been added to NUDO and nothing unnatural such as GMO, food coloring, artificial preservatives, sweeteners, and

artificial flavors has been added either. With the same ideology of supplying natural

and additive free products, Eris launched its second brand Dudomi in 2022. Nudo being on the more premium end, Dudomi is loved and appreciated especially by the younger consumers with its 6 different and delicious flavor. Eris facilities are certified by BRC, ISO 9001 and OHSAS 18001. On top of these Quality Management Certificates, all Eris products, whether it is within the retail or industrial channel, are certified Halal by Gimdes. We, at Eris, believe that food business is a business of conscience and we do not supply any products unless we consume them at our very own houses with our own families and loved ones.

eris

An aerial photograph of an industrial facility. In the foreground, a row of large, cylindrical, corrugated metal silos is visible. The silos are arranged in a line, and the word "eris" is printed on the side of one of them. To the right of the silos is a large, modern building with a glass facade and a flat roof. The building has several loading docks and a ramp. In the background, there are other industrial buildings and a residential area with houses. The sky is clear and blue.
