CAFFEINE

It is the most commonly used substance on the planet. It has been used for centuries for its stimulating properties. 250 ml of the drink contains 37.5 mg of caffeine, almost the same amount as in a cup of coffee.

TAURINE

In the body; it is an amino acid in high amount, especially in the blood cells of the brain and the heart. It helps to regulate the heart rate, muscle contractions and energy levels.

B VITAMINS

They are naturally found in the foods you consume and are Commonly used as energy supplement components. They primarily assist the body in converting food into energy.

NATURAL SPRING WATER
