

HOME COMPOSTABLE CAPSULES

Innovative Torrié Home Compostable capsules reflect commitment to environmental sustainability and are a conscious choice for lovers of Portuguese roasting coffee.

Compatible with
Nespresso®* equipment

Produced exclusively using 100% organic plant materials such as vegetable oils, cellulose and coffee, they are therefore formulated only based on plants and so are free of fossil fuel derivatives. Accordingly, they are easily, naturally and biologically broken down, through home composting.

✓ PLANT-BASED MATERIALS

✗ ZERO PLASTIC

✓ HOME COMPOSTABLE

✗ NO FOSSIL BASED

CLASSIC ESPRESSO

Discover the classic and authentic taste of espresso.

MILD ESPRESSO

Enjoy the softness at any time of the day.

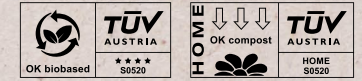

INTENSE ESPRESSO

Boosts the intensity to start the day.

DECAF

Awakens the senses with the aromatic richness of decaf.

CÁPSULAS CERTIFICADAS | CAPSULES CERTIFIED

Once used, Torrié Home Compostable capsules may be placed in a plant pot, garden, home composter or simply placed in an organic waste bin, where they will decompose naturally, no special facility required. This natural decomposition process contributes towards the production of nutrients, themselves natural, enriching the soil and boosting its quality, also significantly reducing waste.

Thus, they are capsules which contribute towards a healthier, more sustainable environment, certified by TÜV Austria, an internationally-recognised certifying body, officially as BIOBASED and HOME COMPOSTABLE capsules.
