# The Vision of Naga

Naga's journey began as a small, family founded, wheat milling company and has now grown into South India's largest single-location wheat milling and pasta producing company, with a production capacity of 360,000 tons per annum.

Our mission started in the year 1973 and our vision has successfully progressed and transformed over multiple generations. We continue to strive to take our vision to greater heights. 40 years later, Naga continues to hold the trust of our valued customers and their loyalty, with our unmatched quality and consistency. Today, our brand continues to be the unanimous choice for every homemaker in the Indian kitchen.

Our factories are located at Dindigul district, a central business hub in the southern Indian state of Tamil Nadu, having crucial connectivity across India by Road, Rail and Air. The nearest international sea port is just 200 Km (125 Miles) by road. Our factories are ISO, FSSAI, FDA & HALAL certified. All Naga products comply with the Food Safety Management System (FSMS) of India.

A central team for quality control, monitors the on-going production process and ensures that they are in compliance with the highest quality standards set by Naga. The team regularly focuses on improvements in process automation, modernization of facilities and implementation of the latest testing methods to check for food adulterants and pathogens. The equipment in our factories are all state-of-the-art, using advanced technology and all the latest features in the food industry.

Naga is constantly on the lookout for fresh opportunities to market new ranges of food products. Our journey begins right at our wheat fields, a holistic process, healthy growth and an everlasting bond with the people who grow them. Our mission to satisfy the contemporary palate, has encouraged us to make a move into the Ready to Cook (RTC), Ready to Eat (RTE) and Frozen food categories.

Naga has been constantly building trust through our quality products & strict QA control standards with our consumers across the globe. Our promise of purity and taste in every meal that you cook is guaranteed. We strive to deliver our food products fresh, straight from farm to fork.
