## SERVICE

### FOOD PROCESSING & PACKING

Our productions currently operate on 8 sets of fully-automated food processors and packing machines, which are required to meet our daily demands. These machines have the ability to operate 24/7 to process, pack, seal and sterilize any food, dessert and beverage products.

If you have your recipe or ideas that wish to develop into commercial packaging under controlled environment, we have the capability to assist you.

### FOOD RETORT PROCESS

In 2015, we invested half a million in Food Retort System using steam technology. This process must be properly executed to achieve a sterilization process under controlled temperature to meet the requirements on food safety.

With this larger capacity and newer technology, we are able to prolong products' shelf-life up to 18 months without adding preservatives yet maintaining the quality.

### OEM SERVICES

We welcome OEM projects. Be it for our grass jelly, desserts or coffee related products, we have the technology, resources, licences and certifications to support your requirements.

With our vast experience, we will assist in providing the professional touch to your product, and our in-house creative team can advise and assist in the design of artwork and labels of your packaging.

## FACTS

Do you know our products contain NO PRESERVATIVES? Each product is sterilised under high temperatures and can be stored in ambient condition without refrigeration.

## ABOUT US

Tan Soon Mui Food Industries first started in August 1974, supplying grass jelly to local markets and food stalls, soon after they were introduced and exported overseas.

In order to maintain quality and consistent supply of raw materials, we work hand in hand with farmers in Indonesia to educate them on the planting, harvesting and storage.

Over the years, to meet the growing demand for grass jelly and Asian dessert, we expanded our manufacturing facilities to our present 1500sqm factory in Woodlands in 1993.

We seek continuous improvement through research and development using more advanced technology and equipment to expand our product range, to improve quality and packaging methods.

Our commitment is to position ourselves as one of the Asia's leading manufacturer for Grass Jelly and Asian desserts.

## DO YOU KNOW?

Grass Jelly, commonly known as Chin Chow or 仙草, is naturally brown-black. Slight bitterness jelly made from dried leaves and stalks, extract of the Mesona Chinensis plant.

Grass Jelly is said to contain medicinal benefits include cooling of body heatiness. It is low in calories which makes a healthy treat.

A dessert to be enjoyed on its own, or made into a refreshing beverage. It can be served with fruits, toppings, soya milk and even coffee.
