Our Company

The Tunisian American Olive Oil Company (TAOOC) is a Tunisian company that was created in 2013 and that specializes in the processing packaging and export of Organic or Conventional Olive Oil.

The company is managed under the trade name Tunisian American Olive oil Company (TAOOC) and our products carry the brand name OLIVNA.

Olivna olive oil is a pure Mediterranean juice that is rich of aromas and made from the best selected hand-picked olives from trees that were never shaken with machines.

Endowed with the best storage, preservation and packaging technologies, Olivna ensures high quality products in order to best satisfy the enthusiasts of world cooking.

Geographical Characteristics

Olivna plant lies in the north western part of tunisia, exactly in the city of Elkef, a city that was historically known, first with the name of sicca in the Cartaginian era in the year 814 B.C, then with the name of Sicca Veneria with the accession of the Roman dominion. The city acquired different names all along its history : Colonia Julia Cirta, Cirta Nova, Sikka Beneria, Chaqbanaria, and the current name, Elkef.

Since ancient times, Elkef has been the main city of the Haut Tell region and the North West of Tunisia, known as well for being the capital of the main agricultural products : wheat, barley, and olives. the city of Elkef is known for its nature, its climate, its pluviometry, its water resources as well as is fertile land which endow the cultivated harvest with an exceptional taste.

Our Main Olive Variety

The amazing mixture of a legendary historical and a land blessed with a rich soil and rainy weather the sun-drenched scenery, together with the cold winters, as well as the highest polyphenol rates provide one of the oldest olive varieties in the world, the CHETOUI, found only in the North of Tunisia and from which our oil is extracted.

The climate of the region, along with the natural ingredients of the soil, contribute to the high quality of our unique organic olive oil characterized by its low acidity, its distinctive aroma, its strong character as well as its delicate fruity taste.

Thanks to its sensory and organoleptic qualities, its richness with polyphenols, proven by the institue Of Cellular Biology in Rome to affect brain proteins responsible for memory, learning and thinking, our oil is considered as one of the best olive oil types in Tunisia.

Our Harvesting Method

We adopt the method of hand-picking for the harvesting of our olives in order to ensure the preservation of our olive trees, which is a distinctive characteristic of Olivna, which endeavors to guarantee an outstanding quality and a unique strong fruity character of the olives. We opted for hand-picking for the collecting of our olives because of our awareness and certitude that olives and mechanization do not go well together, as the branches of the olive trees can suffer, as well as the olives themselves. In fact, the quality of the oil decreases with the increase of electric tools and mechanization because the more softly the olives are treated the better the resulting oil and vice versa.

Our Products

The Tunisian-American Olive Oil Company offers various types of packaging, the most outstanding of which is our new product, the bag-in-box of 3 and 5 liters.

Different products are offered to distributors and buyers of Olivina extra virgin and organic olive oil : 5 liter and 3 liter bag-in-boxes; 250 milliliter, 500 milliliter, 750 milliliter and 1000 milliliter.
