ABOUT US

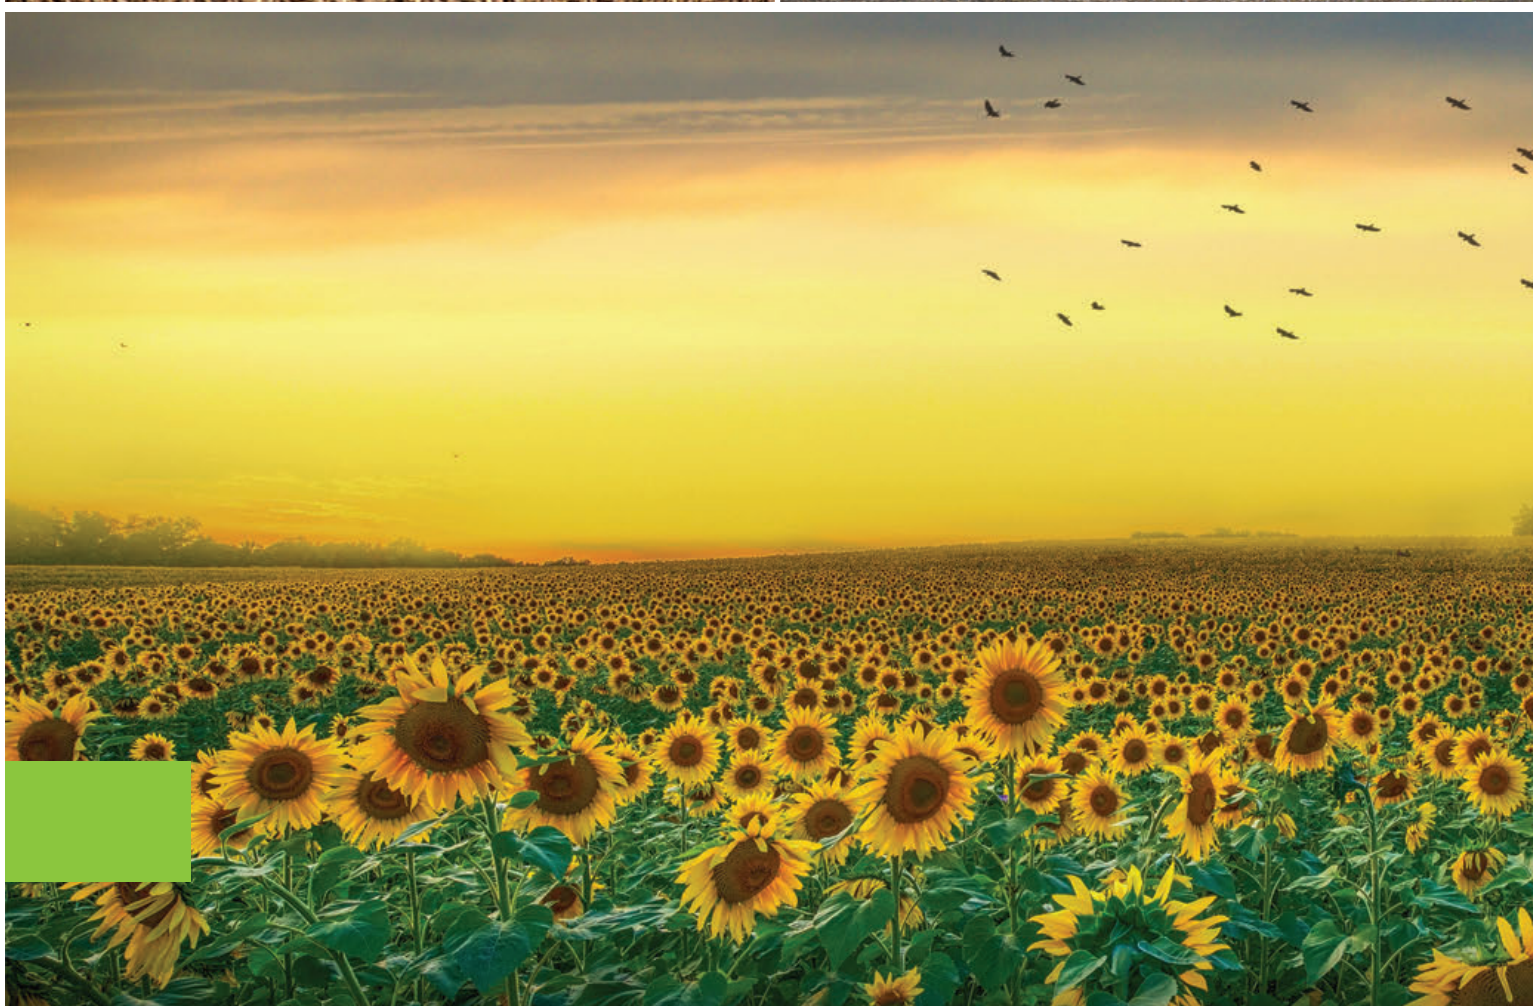

BonOil

BONOIL IS ONE OF THE LARGEST PRODUCERS OF SUNFLOWER KERNELS AND OIL IN BULGARIA

Bulgaria has a rich history of agriculture, and its climate is suitable for cultivating high-quality products.

We are located near the Bulgarian village of Kalchevo (100 kilometers from Port Burgas) and currently harvest more than 20,000 acres of private land. Thanks to the strong relationships we maintain with other farmers we are capable of ensuring quality and traceability for all raw materials. With the knowledge of our team and the application of modern technologies, we can guarantee flawless results.

STORAGE

The quality of the final product is directly impacted by how the raw ingredients are stored

SILOS

BonOil ensures that the oilseeds are chosen, transported and stored in compliance with all quality and safety standards.

To ensure that only the finest raw materials enter our production, we store clean and dry premium seeds in the automated silos. We constantly monitor the temperature, moisture, and other crucial storage conditions. Our raw materials are of Bulgarian origin.

BonOil

SUNFLOWER KERNELS

Our dehulling factory is fitted with modern technology, certified by IFS 8, Halal, Kosher, ISO 22000, FDA and Sedex

Equipped with an internal laboratory leading to perfect production. The production technology includes multistage cleaning and sorting. The dehulled sunflower kernels are separated from the shell and pass CCP ensuring the final product. Laboratory testing is an important process. It provides data on the quality of our products an the production process. Our products are also GMO and Allergen Free.

By installing solar panels, we have taken a step toward reducing negative environmental impact.

21 IBC

24 IBC

IBC - Customers looking for a more efficient package for large quantities should turn to intermediate bulk containers (IBC). They are easy to use, transport, and recycle. Standard IBC includes a high-density polyethylene box in a solidly reinforced steel cage that is attached to a wooden, plastic, or steel pallet.

Private label

Private label means you can build and grow your own brand.

Flexi Tank: Up to 22 mt. This option is an alternative to tanker trucks and one of the most economical bulk packaging methods for shipping overseas. A food grade specialized bag is placed into a standard 20 ft container and removed after unloading.

Tanker truck: Up to 25 mt - We own a large number of tanker trucks that are used for sunflower oil.

BonOil

OTHER PRODUCTS

Crude sunflower oil

Description: Crude Sunflower oil is the non-volatile oil expressed from sunflower seeds. It is used in food as a frying oil, and in cosmetic formulations.

Packing: Bulk

Free Fatty acids

Description: High quality of our phosphatide concentrate. This product is used in food industry, in production of animal and poultry fodders and for technical purposes.

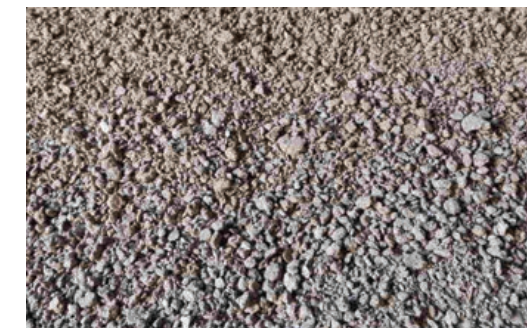

Packing: Bulk

Sunflower pellets

Description: Pellets made from sunflower husks are 100% environmentally friendly. Can be used in any type of heating system.

Packing: Bulk

Sunflower Meal

Description: High-protein sunflower meal obtained after the oil is extracted from the seed. Contains 36% protein.

Packing: Bulk
