## ADVANCED TECHNOLOGY

We offer agricultural products cleaned, sorted, processed and packed with state-of-the-art technology. Our plant's high capacity machineries include high technology pre-cleaners, super fine cleaners, distoners, gravity separators, color sorters, x-ray sorters, packing equipment and more.

The rigorous process we employ ensures product outputs adhere to the highest cleaning standards by removing all foreign particles. This provides our customers with the finest agricultural products available in the market today.

## PROCESSING PLANT

Our processing plant was carefully designed and constructed according to the International food safety standard to provide excellent services that satisfy the needs and requirements of our international clients.

The plant is equipped with a state-of-the-art monitoring and surveillance system that enables the management and plant managers to control and monitor operations 24/7, and from anywhere in the world. The plant is also equipped with a digital high standard weight bridge.

## WHO WE ARE

Founded in 2019 in Addis Ababa, TEWOMED Trading PLC has been committed to providing superior Ethiopian agricultural products and services. Our export division offers an extensive range of top quality oil seeds, pulses, spices and green coffee beans of Ethiopian origin. Our premium quality products and our impeccable service, have established us amongst industry leaders in agricultural exports. Originating from farmer producers and elevators in the heartland of Ethiopian agriculture, our products are trans-loaded into containers for shipment around the world.

The Company's operations extend across procurement, processing, warehousing, transport, and containerized export. We're a full-service supplier with a flexible, logistical network capable of fulfilling orders of any size and specification.

The company is also engaged in the import of machineries for processing, cleaning and packaging agricultural produces. Leveraging our extensive international business network, we also participate in international tenders floated by the Ethiopian Government, and supply in bulk, various products representing our suppliers worldwide.

## TRANSPORT AND PACKAGING

Trucks with 5-40tons capacity are used to transport raw materials to central markets as well as to the ECX warehouses and to our processing plants. Our processed products are packaged either in polypropylene bags (PP) bags or fiber jute bags as per clients' requirements. We pack 25kg, 30kg, 40kg, 50kg, 60kg or 1ton Jumbo bags according to our customers' requirements.

32-40tons capacity trucks are used to transport finished products from the processing plant to port, and will be containerized/stuffed at the port terminal and will be ready for shipment.

Transit time:

- 3 days from Addis Ababa to Port of Djibouti
- 2 ½ days from Adama (Nazret) to Port Sudan
- 7 days from Humera area to Port Sudan
