

EverRaw® Juice Powder

- ✓ Shelf Stable Raw Food
- ✓ Premium Quality
- ✓ Preserves the Goodness of Nature
- ✓ No Thermal Degradation
- ✓ Retains Nutrition at Full Potency for Years
- ✓ Balanced Micronutrients

How Raw Food Stays Fresh

In 1999 LiquaDry developed BioActive Dehydration™, an ambient temperature spray drying process that dries our products to a powder at less than 41°C (106°F) and causes virtually no thermal degradation to botanicals.

This gentle drying process preserves the color, flavor, aroma, and nutrients of fresh juice creating the industry setting standards of EverRaw®. Our facility is NSF certified to dietary supplement standards and is non-thermal from start to finish.

Why Grass Juice Powder?

To extract the nutrients from the plant fibers before the cellulose dries and locks them in.

- ✓ Superior Flavor and Color
- ✓ Bio-Availability
- ✓ Fast Absorption
- ✓ Rich in Vitamins and Minerals
- ✓ High in Chlorophyll
- ✓ Ambient Temperature Spray-Dried

(Delta, Utah, USA)

We Control the Entire Process

Seed | Harvest | Juice | Powder

Our Premium Grass Juice Powders include WHEAT, BARLEY, ALFALFA, OAT, and KAMUT® WHEAT. They are 100% Grass Juice and contain no fillers or additives. They are Clean Label, non-GMO, Gluten Free, Raw and are 100% Organic.

Our farms are Certified organic by Oregon Tilth, owned and operated by LiquaDry, harvested at optimal maturity, and located in the mineral-rich soil of an ancient sea bed in remote Delta, Utah.
