Dairy farms for cattle with different production capacities

We build dairy farms with various types of milking equipment:

- milking parlor “carousel” for farms from 800 heads;
- milking parlor “parallel” for farms from 200 heads;
- robotic milking for farms from 65 heads.

Cow productivity indicators

Milk productivity, kg/year	9 125
Milk productivity, kg/day.	30,00
Milk marketability level, %	93%

Goat dairy farms with different production capacities

We build dairy farms for goats with various types of milking equipment:

- milking parlor "carousel" for farms from 1500 heads;
- milking parlor "parallel" for farms from 200 heads.

Productivity indicators of dairy goats

№	Name	Meaning
1	Average annual productivity per 1 dairy goat, kg	950
2	Average daily productivity per 1 dairy goat, kg	3,1
3	Milk marketability level, %	95

Sheep dairy farms with different production capacities

We build dairy farms for sheep with various types of milking equipment:

- milking parlor "carousel" for farms from 1500 heads;
- milking parlor "parallel" for farms from 200 heads

Productivity indicators of dairy goats

№ п/п	Name	Meaning
1	Average annual productivity per 1 milking sheep, kg	278
2	Average daily productivity per 1 milking sheep, kg	1,8
3	Milk marketability level, %	92

Meat farms for sheep with different production capacities

We build farms for meat sheep:

- for 3250 ewes;
- per 10,000 ewes.

Productivity indicators of meat sheep

№	Name	Meaning
1	Fertility of the uterus, not less	4
2	Meat yield in slaughter weight, %	52
3	Weight of lambs at 100 days, kg	38

Meat pig farms with different production capacities

We build pig farms with different capacities:

- for 210 sows -
- for 3500 sows, etc.

Construction of a slaughterhouse for farm animals

We produce and supply equipment for slaughter and meat processing of various capacities:

- up to 100 heads per shift – manual slaughter line;
- from 100 heads per shift – automated slaughter lines

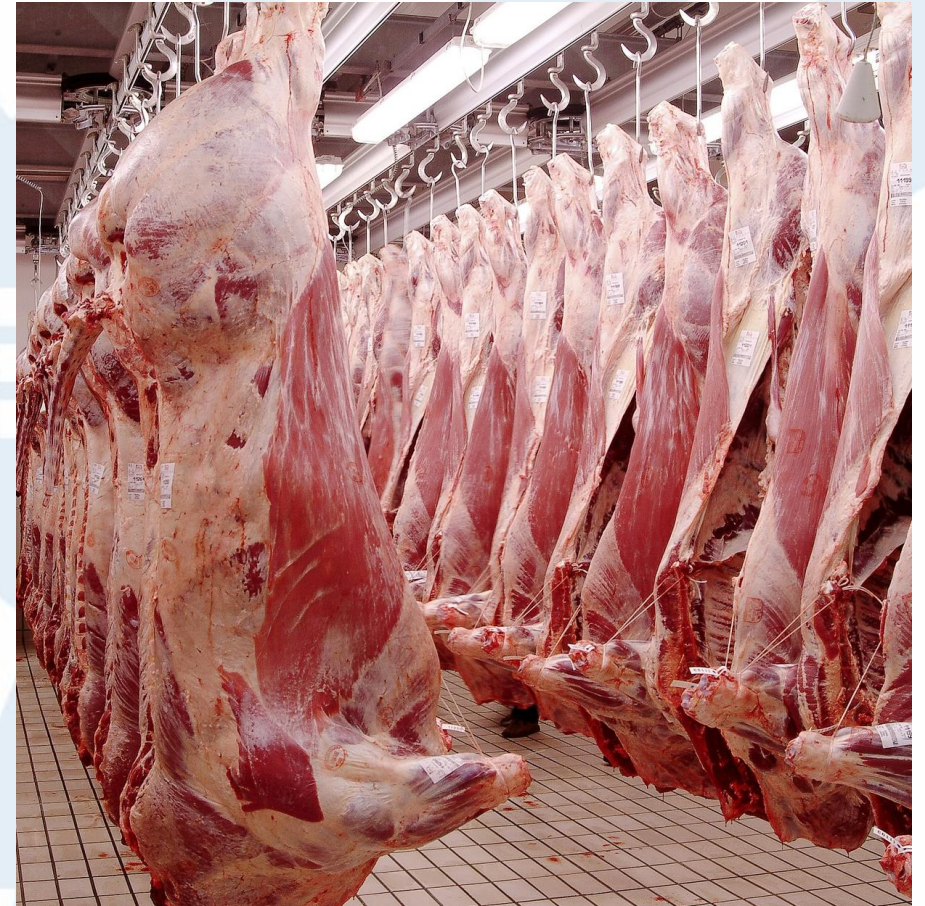

2 year warranty

2 year warranty

Genetic material of sheep for intensive sheep farms (4-6 lambs per 1 lambing)

Embryos from the best sheep

Sperm doses from the best rams

Embryo transfer;
Laparoscopic artificial insemination

Training your specialists.

Construction technology

wooden roof trusses with
slate and false ceiling
protects from the sun

Concrete sandwich
panels for walls - for
protection from heat

Anti-slip notches.
Special hole for scraper
chain

Individual pet areas,
rounded to prevent injury.

Construction technology

Rounded area for
perfect cleaning of the feeding table

prefabricated silage and haylage trenches

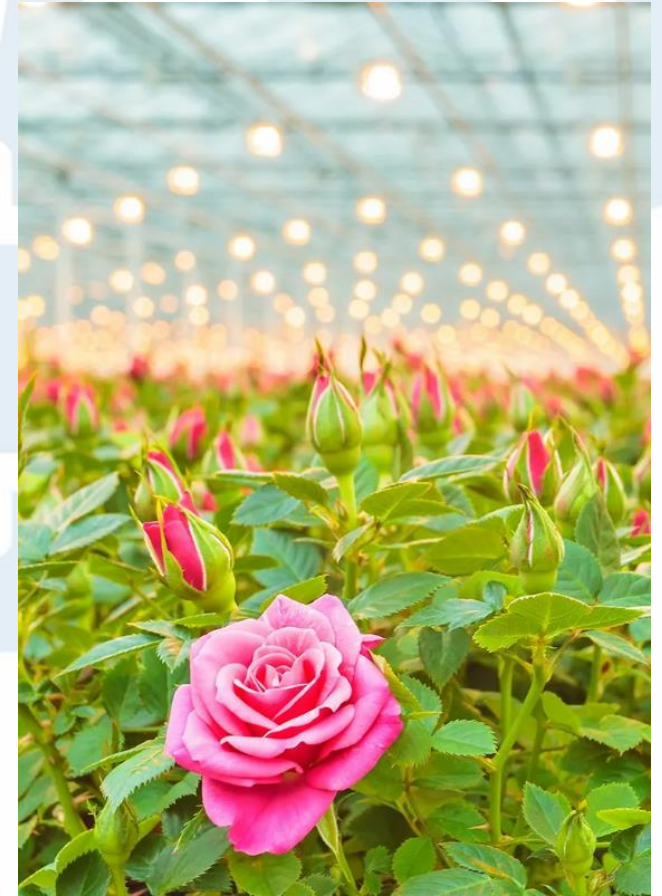

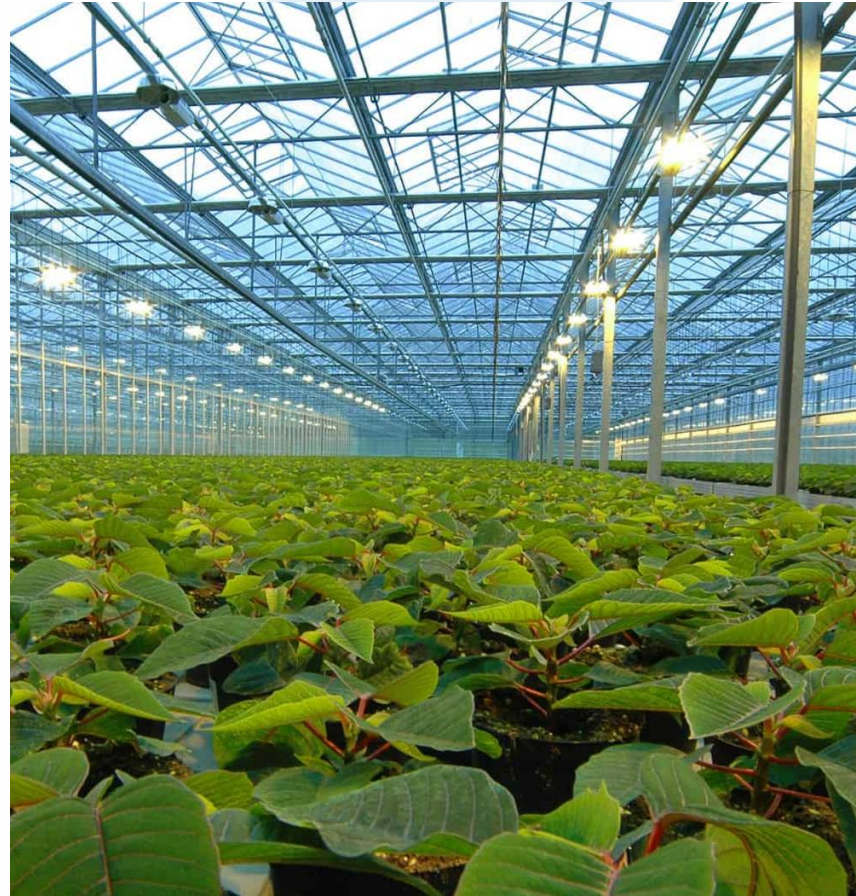

Construction of storage and processing facilities for fruits

- Procurement, export.
- Reception and preparation for storage
- Multi temperature chambers
- Pre-sale preparation – Sorting&Packing
- Product processing
- Computer system for management, accounting and control RFID
- Automation and information system for warehouse and transport management and logistics

Construction of greenhouse complexes for growing vegetables and flowers

We build greenhouse complexes for growing tomatoes, cucumbers, salads and flowers of various sizes

iFarming
