THE HYPER FOCUSED GCC TALENT COHORT

GCC School is built on an innovative **Hire - and - Train** model with corporate partners, we enable Young Aspiring Professionals (YAPs) to secure career pathways first to build purposeful careers.

Bridging the gap between strong academic credentials and global workforce capabilities.

The Strategic Rise & Growth Trajectory of Global Capability Centers (GCCs)

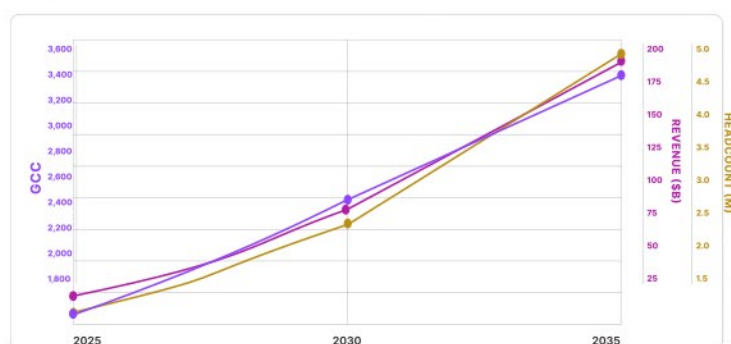

Global Capability Centers (GCCs) are strategic hubs established by multinational organisations to deliver business services for global operations in our country.

India has emerged as the GCC capital of the world.

Currently India has **1,800+ Global Capability Centers** with the workforce of **2+ million professionals**. This ecosystem is **expected to expand to 3,500+ GCCs**, employing **5+ million professionals** in the **next 10 years**. Currently, 44% of GCCs in India operate end-to-end ownership models, driving innovation and global collaboration, and this share is projected to **grow at a CAGR of approximately 14%** in the coming years.

ABOUT THE WORLD'S FIRST GCC-FOCUSED SCHOOL

Vision

To build a globally trusted, equitable, and sustainable AI literate talent ecosystem that identifies latent potential early, aligns it with real-world opportunity, and develops future-ready leaders capable of delivering measurable impact across global enterprises.

Mission

To architect global career pathways by introducing India's first inverse education model. This is where corporate outcomes precede education, ensuring a zero-risk transformation of selected AI enabled talent into market-ready leaders through immersive industry engagement.

Core Values

- **Founder & CEO, GCC School**

- **US CPA & Indian Chartered Accountant with 20+ years of global experience**

- **Ex. - EY, PwC & Indorama Group**

- **Author & Educator for UK ACCA, US CPA, US CMA and US Taxation programs**

A Purpose-Driven Message from our Founder

The global finance industry does not suffer from lack of degrees; it suffers from lack of job-ready professionals. For over two decades, I've witnessed this gap closely across audit, assurance, taxation, advisory, and similar roles worldwide. Academic knowledge alone has never been enough. Careers are built where learning meets real work.

With this belief, I've founded KC GlobEd, a finance-focused AI - powered edutech platform committed to bridging academic learning with global professional practice through deeply industry-aligned education. Today, that mission advances further with the establishment of the world's first GCC School.

Located in the heart of India's Global Capability Centres in DLF Cyber City, Gurugram, the GCC School is a purpose-driven campus built on a clear Employment-to-Education (E2E) philosophy. Here, careers come first; learning follows with precision.

Our vision is simple yet bold: to build elite AI-savvy finance professionals by aligning real roles before delivering targeted, outcome-driven education. High-potential learners are honoured by being connected to actual global roles and then equipped with exact skills, knowledge, and exposure the roles demand.

Our mission is to unify global qualifications, live industry exposure, and professional capabilities into a single, structured pathway. Through a rigorous experiential learning model, learners progress from role alignment to capability mastery, transforming ambition into measurable performance.

The GCC School exists to create AI-savvy professionals who are not just employable, but indispensable, ready to contribute, adept, and grow within global finance ecosystems from day one.

This is not a campus for certificates, but for sustainable careers.

I personally welcome aspiring students from across the country to GCC School. Our mission is to prepare future-ready talent for Global Capability Centers. We focus on industry-aligned learning, practical exposure, and career readiness. I invite you to join GCC School and build a strong foundation for a global career.
