SECTION EDITOR ROLE

Section Editors (SEs) are an integral part of the journal and its operation. They are experts in the fields of research they serve, experienced in the peer review process, ambassadors for Open Science, and active participants in their communities. Section Editors lead the subject sections within the journal scope and advise a group of Academic Editors with expertise in their discipline.

SEs oversee a greater number of manuscripts than Academic Editors (AEs) but are not required to take a hands-on role in the review process. The invitation process works differently as well: Section Editors are not “invited” but are assigned incoming manuscripts in their area of expertise by the staff.

The SE position requires less hands-on time with manuscripts, but it is a role with a greater degree of responsibility and authority. The final decision on manuscript acceptance lies with the Section Editor, and we rely heavily on our Section Editors to resolve difficult issues, provide advice to their fellow Section Editors, and to assist us in preventing delays caused by unresponsive Academic Editors or reviewers.

To foster a partnership between the journal and the research community, Section Editors strive to:

Edit

- Assess the quality and scope of new submissions within three days
- Secure an Academic Editor or Guest Editor on manuscripts as needed
- Submit a decision within three days of receiving a recommendation
- Adhere to editorial best practices

Advise

- Provide counsel on journal policies, including scope, research ethics, community standards, and reporting guidelines within their discipline
- Advise on the suitability of a manuscript for publication at any stage of the peer review process and in relation to any aspects covered by the publication criteria (scope, study design, ethics, etc.) within their discipline
• Adjudicate on difficult editorial decisions and advise in appeals as needed

Lead

• Act as a leader or co-leader of a section

• Support and advise Academic Editors in their section in editorial decision making and more broadly by providing editorial guidance

• Assist in the editorial development of their section and the journal as a whole, including content curation, solicitation of submissions and selection of content for promotion within their disciplines

• Recommend potential candidates with expertise in their discipline to serve as Academic Editors

Represent

• Actively promote and maintain the integrity, reputation and high editorial standards of the journal

• Liaise with journal staff, Editorial Board members, and in the community as the voice of their section
Assignment to a SE

• The PLOS journal team assigns papers direct to Section Editors (SEs) based on the section you are in and the number of papers you are already handling.

• You will receive an email notification if a new submission has been assigned to you.

Before proceeding, please check that you have no competing interests with any of the authors that would prevent you from handling the submission without bias. If you have a COI or cannot handle the paper for other reasons, please notify the journal to have the paper reassigned.

Please email the journal if you feel you are handling too many or too few papers.

Navigating Editorial Manager: Finding Your Assignment

• Log into Editorial Manager (EM)

  PLOS Computational Biology | PLOS Digital Health | PLOS Genetics |
  PLOS Neglected Tropical Diseases | PLOS Pathogens |
  PLOS Sustainability and Transformation

• You will find all of your Pending Assignments in the Editor ‘To-Do’ List section of your Section Editor Main Menu. Click on the relevant link to access your manuscript assignments.
Navigating Editorial Manager: Manuscript Actions

- **View Submission** is where you download the full submission PDF.
  - You can access high-resolution versions of each figure by selecting the blue link at the top of the page each figure appears on.

![Click here to access/download;Figure;Fig 1.tif](image)

- You can find Supporting Information files and Related Manuscripts (if included) via blue links at the end of the submission PDF.

![Click here to access/download Supporting Information](image)

- **Details**: This page contains information about the manuscript including staff editor notes, authors, keywords, abstract, reviewer statuses, and more.

- **Initiate Discussion**: Open a discussion with other members of our Editorial Board to solicit their advice. [More details](link) on this action.

- **History**: This page contains a chronological listing of the manuscript’s status and correspondence history.

- **Assign Editor**: Use this link to invite Academic Editors (AEs). [More details](link) on this action.

- **Invite Reviewers**: Used by AEs to find, secure, and manage reviewers.

- **Submit Editors Decision and Comments**: On this page that you will issue your
Decision - either reject before review or after the AE’s decision has come to you for approval.

Initial Assessment by the SE

- After assignment, conduct an independent assessment of the manuscript to decide whether the manuscript fits within the journal scope and publication criteria.
- Ideally, you will issue an initial decision within 48 hours of a paper being assigned to you although this may take longer, particularly if there are editorial discussions.

At this stage you can take one of the following actions:

a) Issue a Reject decision
b) Invite Academic Editors
c) Initiate a discussion

Navigating Editorial Manager: Reject Before Review

- Click Submit Editor’s Decision and Comments from the manuscript Action links.
- Select your Decision - either Reject or Reject and Transfer - and add comments to clarify your reject decision in the Comments to Author section. These will automatically pull into the decision letter. Click Proceed and then Proceed again.
If you select **Reject and Transfer** you will also have to select which PLOS journal you are recommending transfer to.

- This will take you to the decision letter templates. Select the **Reject Before Review** letter in the **Modify Letter** dropdown.

- Read the decision letter at the bottom of the page to ensure it is accurate and that your comments have been pulled in correctly. If you did not add your comments to the Comments for Author box, you can edit the letter to add them now. Be sure to remove the placeholder text.

- When you are ready, click **Send Now** to send the decision letter to the authors.

---

**Navigating Editorial Manager: Inviting Academic Editors**

- If the manuscript fits within the journal scope and meets the publication criteria you will send it on to an Academic Editor (AE) from the **Editorial Board**.

- Click **Assign Editor** from the manuscript action links.

- Choose an AE or Guest Editor (GE) using the search fields (first or last name, email, Personal Classifications, etc.)
Consider an AEs workload in the **Current Assignments** and **Open Invitations** columns and their availability in the **Available during next 7 days** column.

- Choose the editors you would like to invite by checking the box next to their name, customize the invitation order, and then **Add to Queue**. We recommend selecting at least 3 or 4 editors to invite.

<table>
<thead>
<tr>
<th>Select</th>
<th>Invitation Order</th>
<th>Editor Role</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1</td>
<td>Academic Editor</td>
</tr>
<tr>
<td></td>
<td>2</td>
<td>Academic Editor</td>
</tr>
<tr>
<td></td>
<td>3</td>
<td>Guest Editor</td>
</tr>
</tbody>
</table>

- Click **Submit Queue without Customizing Letters** to send standard invitations or **Customize Letters & Submit Queue** if you would like to modify the invitation templates.

- EM will invite the first Editor to the paper immediately and the next will be invited when the first declines, or when 2 days have passed, whichever happens first. When someone agrees, all existing invitations will be closed and the editors notified.

- If an Editor declines you will receive an email with any comments they supplied.

If there isn’t an AE with the time or appropriate expertise and you know of someone who would be suitable, contact the journal office. We will reach out to them about joining the Board as either an Academic Editor or Guest Editor to handle the manuscript.

**Navigating Editorial Manager: Initiating a Discussion**

- Open a discussion with other members of our Editorial Board or staff to solicit their advice. Select **Initiate Discussion** from the Action links of the paper.

If the paper has previous discussions, the **Initiate Discussion** link will be replaced with **Discussion** and you will be taken to an intermediary page. On this page you will need to click **Start New Topic** to initiate a separate discussion.
• Once you have initiated the discussion you will see the discussion box. You do not need to choose a topic template. Fill in the **Topic** and **Initial Comments** boxes.

![Choose Topic Template: Please Choose](image)

- When your comments are ready add other participants via the search. It is best to search by Last Name or E-mail Address. Please avoid adding anyone who is unavailable.

- When you have found the people you are looking for, tick the box next to their name then select **Proceed to Customize Letters** then **Confirm Selections and Proceed**.

- This starts the discussion. You will receive an email when anyone responds in the discussion.

⚠️ **Do not select Start Discussion without Sending Letters.** If this is selected the discussion will start but no one will be notified and you will not get a response.

![Flowchart](image)

**AE Responsibilities**

- Academic Editors are responsible for conducting an initial assessment of their own where they too can decide whether to reject without review or invite reviewers.

- If they decide to send out for peer review, they are then responsible for finding and securing reviewers, and evaluating reviewer comments to issue a decision.
SE Reviews Decision and Sends to Authors

- All draft AE decisions will be sent to you for approval.

Navigating Editorial Manager: Reviewing Academic Editor Decisions

- Decisions ready for review will be in your Submissions with Required Reviews Complete folder on your main menu. Please action these within 48 hours.

- Select Submit Editor’s Decision and Comments from the action links.

- This next screen shows you the decision letter the Academic Editor submitted.

- Please read the decision letter at the bottom of the page to ensure it is accurate and all relevant editor and reviewer comments have been pulled in correctly.

- If the paper is being rejected please double check that the correct letter template (before or after review) has been used.

- If you do not agree with the AE decision or would like to discuss anything with them, please initiate a discussion with the AE.

- When you are ready, please select Send Now which will send the decision on to the author.

Revisions

- When authors submit their revised manuscript, it will be automatically assigned back to the AE.

- You will be notified once the AE has submitted a decision on the revision. At this stage, you should follow the same process as above.

Appeals

- Occasionally, authors will choose to appeal a decision to reject a paper. These requests
must go through the journal office, so if you receive any direct queries, please pass them on to us.

- As a general policy, apart from in special cases, we do not reconsider manuscripts that have been rejected before peer review.

- Appeals for manuscripts that are rejected after review are passed to you and the AE who handled the paper. This will either be in the form of an email, or a discussion, and you and/or the AE just need to let us know whether you’d be willing to reconsider the manuscript. PLOS will handle all correspondence with the author.

Navigating Editorial Manager: Setting Unavailable Dates

- Set unavailability by going to **Update My Information** at the top of the page in EM.

- Scroll down to the **Additional information** section and input dates via the **Unavailable Dates** button. No new manuscripts will be assigned at this time.
Competing Interests and Ethical Publishing Practice

- If you become aware of a possible breach of an editorial or publishing policy, please notify the journal team immediately.

**Competing Interests for Editors and reviewers**

Editors (professional or academic, paid or unpaid) and reviewers must declare their own competing interests, and if necessary disqualify themselves from involvement in the assessment of a manuscript.

Common reasons for editors and reviewers to recuse themselves from the peer review process may include but are not limited to:

- They work at the same institution or organization as an author, currently or recently
- They collaborate with an author, currently or recently
- They have published with an author during the past 5 years
- They have held grants with an author, currently or recently
- They have a financial relationship with the company who funded the research
- They have a personal relationship with an author that does not allow them to evaluate the manuscript objectively

**Code of Conduct for Editorial Board Members**

- PLOS Editorial Board members follow the [Code of Conduct for Editorial Board Members](https://www.plos.org/policies/code-conduct-boards), all [PLOS Editorial and Publishing Policies](https://www.plos.org/policies), and the Committee on Publication Ethics (COPE) [Ethical Guidelines for Peer Reviewers](https://www.publicationethics.org.uk/code-conduct).

**Flagging Issues to Staff**

- Please forward any correspondences that occur outside of Editorial Manager with authors to journal staff that requires attention
- **Appeals** - This is to help maintain proper records of appeals and author correspondences and ensure that you have the support of the journal when dealing with tricky situations

- **Author ethics issues** like suspected image manipulation or plagiarism

  - During review, please notify staff if you have serious concerns over a reviewer’s behavior or the content of their review.

  - We appreciate it when you notify staff if you accept a paper that is particularly press-worthy or otherwise notable.
