

Geotab Keyless

A scalable digital key solution

Optimise your fleet operations

Save time and costs with Geotab Keyless – a solution offering secured vehicle access for pooled and shared fleets, even when vehicles are parked out of mobile coverage. Geotab Keyless is built on top of the Geotab scalable and flexible telematics platform and provides the tools you need to optimise fleet performance at every level.

The Geotab advantage

- + Fully digitised keys that lock and unlock vehicles over the IOX-Keyless Bluetooth® connection or the mobile connection of the GO device.*
- + Integrations with a variety of best-in-class shared mobility software solutions.
- + Easy-to-use APIs for quick integration into new systems.
- + Compatible with all vehicle types that have a key fob.
- + Secured access to vehicles, even when parked out of mobile coverage areas using the driver's mobile phone or an NFC tag.
- + Optional harness for starter inhibition when vehicle is not in use.
- + Limit vehicle and individual user access to particular days or times of day.
- + Detect breakdowns and plan proactive vehicle maintenance to avoid expensive repair costs.

*Available for G09 and newer device versions.

Reduce costs, increase utilisation and protect your assets

Available exclusively on the ProPlus + Keyless rate plan, the Geotab Keyless solution is ideal for fleets in car share, rental and leasing, field services, shift management, vehicle dealerships and more.

Benefits of Geotab Keyless

Secured keyless access

Lock and unlock your vehicles via Bluetooth® or mobile connection without a physical key. Geotab Keyless helps ensure only authorised users access your vehicles.

Protect your assets

Increase fleet security from theft and misuse with remote vehicle management, starter inhibit functionality and more.

Scalable

Geotab Keyless is easy to install and supports all vehicles with a key fob, including electric, hybrid, light-, medium- and heavy-duty vehicles.

Improved utilisation

Know where your vehicles are at all times. Take advantage of complete fleet visibility to reduce, repurpose or redistribute assets to increase utilisation.

Software reservation partners

Build your own software or leverage one of Geotab's trusted software reservation partners.

Actionable telematics data

Keep your fleet running smoothly with preventative maintenance, collision detection and reconstruction, and more.
