REPLICHROME

Totally Rad! Inc. has created **Replichrome**, a group of Lightroom and Photoshop presets for digital shooters who still relish the look of particular traditional film stocks. The company collected 13 popular film stocks, including Fuji 400H, Kodak Portra 400 and Kodak TRI-X, and shot in every lighting condition and with every camera possible. Then using Noritsu and Frontier scanners, the team created 134 total workflow presets. Each preset gives you additional control over tone, color, grain and density. List Price: \$99.

MOBILE APPS

PicTapGo is a filter-blending app with 55 unique individual filters. Combine these filters in different strengths to create your own personalized recipes and save them in the My Style tab for quick use later. Then easily share your photo directly to your favorite social-media app or save it to your Photo Library. List Price: \$1.99. **Contact:** Totally Rad! Inc., www.pictapgo.com.
