

Emergency Services Teams Rely on OneScreen for Communication and Training Behind the Scenes

Executive Summary

The public depends on trained professionals in Emergency Services. Elite training and precise communication are the top priorities for the nation's firefighters, emergency response crews, and many others. OneScreen has emerged as the manufacturer of choice for those teams by providing the highest quality interactive whiteboards and video walls for emergency coordination and training.

The Challenge

When a call comes in, first responders have to be prepared for anything – from structure fires to medical emergencies, auto accidents and more. That is when their first-class training kicks in.

Emergency services teams excel when they communicate and train with high definition video, precision audio and a wide range of integrated apps for the breadth and depth of detail they need. Fire marshals and fire chiefs across the country agree that there's no room for error in difficult situations, so the quality of their communication equipment must pass a higher bar.

OneScreen brings it all together at a price that makes sense for public safety organizations of all sizes.

“

We were particularly awe-struck by the quality of OneScreen's HD video conferencing capabilities. The unit provides staff members with a practically 'in-person' experience and lag time was non-existent. All I can say is 'Wow!'

~ Chief Daren Olson,
City of Alameda Fire Department

Solution: Communications

Simple, direct lines of communication make all the difference when every second counts. OneScreen makes it simple to coordinate widely dispersed teams with clear streaming video calls, 4K cameras, noise-canceling microphones, annotation capabilities and instant transcription/translation.

OneScreen Video Walls are there to clearly display Need-to-Know information in Ultra HD resolution. Updates can be made on the fly with any mobile device and there are hundreds of templates to choose from.

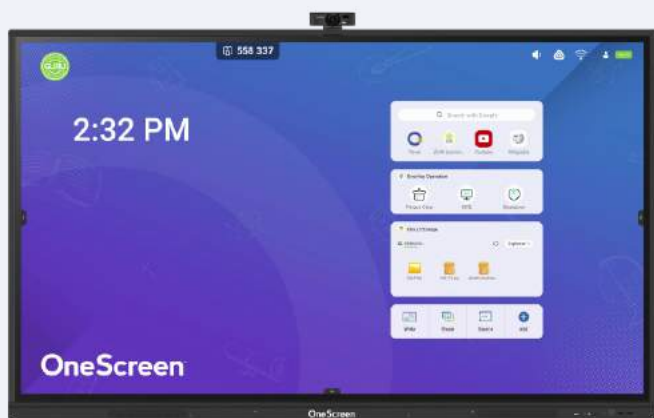

Solution: Training

Excellence in training is the hallmark of professional emergency services. With OneScreen's interactive whiteboards, trainers have all the tools they need in one place, connected to all the resources of the Web.

Zero bonded touch means writing with a stylus or just a finger is as smooth as writing on paper. Pause and annotate video in real time, run pop quizzes with the online polling feature, share the lesson wirelessly from any device in the room.

Interactive Displays

Screens that fit your workflow.

Powerful, interoperable and all-in-one for communication and training. Available in four standard sizes: 55", 65", 75", and 86".

Video Walls

Form and function in one, easy-to-own package.

Wireless screen share and easy, front access for maintenance. Available in standard sizes from 138" to 220" or custom-built for your location, inside or out.
