

OneScreen™ Beacon

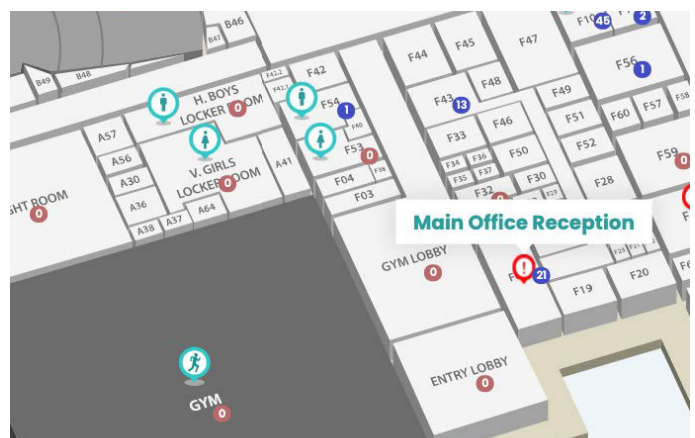

Know when and where help is needed, now.

Critical events from medical crises to accidents or even bad behavior, require the fastest possible response.

- Real time notification and location service
- Barrier-free access to help from a wearable badge
- Personalized badges are programmed with individual ID numbers

OneScreen Beacon provides a badge-based, Real-time priority notification service for campuses and individual buildings.

User can send notifications with two clicks, sending an alert to assigned contacts that help is required in their location.

Location is based on proximity to OneScreen T7 displays that act as receiver devices for the notifications.

Comes with free, unlimited, live Screen Skills Guru support available via email, chat, phone, video, audio and Guru app.
