GLOBAL MATH PROJECT

Uplifting Mathematics for All

About the Global Math Project

We are a community of people who want all learners and teachers across the globe to experience joy and wonder in school-relevant mathematics.

The Project was founded by a team of seven people who had the bold and audacious vision to bring the world together through common mathematics experiences, opening the doors for all.

OUR CORE VALUES

- Mathematics is for everyone!
- Teachers are the greatest advocates for mathematics.
- Everyone is part of the global mathematics community.

OUR CORE PRACTICES

- Ensure inclusivity and free access for all.
- Remain curriculum relevant but curriculum agnostic.
- Let mathematics shine for itself.

WEEK 2017

HIGHLIGHTS OF GLOBAL MATH WEEK 2017
FEATURING *EXPLODING DOTS*

96.8%
Helped students see math as more
APPROACHABLE

96.1%
Helped students
see math as
MAKING SENSE

96.6%
Helped students see
math as more
ENJOYABLE

93.1%
Helped students be more
CONFIDENT

76.3%
students **STILL DISCUSSING**
Global Math Week

TEACHERS AGREE OR STRONGLY AGREE THAT GLOBAL MATH WEEK 2017:

94.2%
RECOMMEND
Global Math Week To Others

"Hands up in the air in triumph! Decades of believing I couldn't do math—poof! Exploded!"

"My students are so engaged that you will still hear them saying kapows and kabooms in the hallways..."

"Eureka! Now I understand why we add numbers this way."

"Exploding dots blew my kids' mind! So much so, they wanted to miss PE to continue with math!"

"Exploding dots has changed my mind, and thus my life! Thank you!"

WHAT'S NEXT

We believe Global Math Week is today's quickest, most effective way to bring joyful mathematics into classrooms around the world.

Help us grow the impact of Global Math Week over the next five years by sponsoring:

- **Translation of content – written guides, web content, video subtitles – into hundreds of languages.**

- **Development of website infrastructure, including a centralized community platform for the citizens of the world.**

- **Content and interaction application development, testing, and refinement.**

- **Workshops, symposia, and training camps for teachers**

- **In-person outreach to underprivileged communities**

- **Public and media relations**

Together, we can reach 10 million students!
