

SUSTAINABLE LEADERSHIP PROGRAMME

LEADERSHIP & SUSTAINABILITY PATHWAY

LEVEL 4 APPRENTICESHIP STANDARD

This apprenticeship develops the leadership capabilities, strategic thinking, and sustainability mindset needed to drive long-term organisational success in a rapidly changing world. Learners build the confidence to lead people, influence culture, navigate complexity, and create meaningful impact across operations, communities, and business performance.

Combining modern leadership with practical sustainability expertise, the programme equips professionals to lead organisations that are more resilient, responsible, and prepared for the future.

Chartered
Management
Institute

includes CMI Level 5 Certificate in Sustainability Leadership & Management

FOR INDIVIDUALS

Develop the confidence, leadership capability, and strategic mindset to become a modern leader who can drive positive change, influence organisational culture, and create long-term value.

FOR EMPLOYERS

Develop leaders who can build resilient teams, improve decision-making, drive innovation and embed sustainable thinking into everyday business practice, supporting long-term organisational performance and growth.

GUEST SPEAKERS

This programme includes four external guest speaker sessions aligned to core learning themes, providing real-world insight, practical application, and examples of impactful leadership and organisational change.
