

Privacy Policy for "Goodness" App

Effective date: June 28, 2026

This Privacy Policy explains how the Goodness mobile application (also known as "World of Goodness" in the Apple App Store) handles information. Goodness is designed to work without registration or sign-in.

1. Information stored on your device

Goodness stores game progress, task history, optional profile details that you enter, settings, and photos that you choose or capture for the app. This information is stored locally in the app's data on your device. The current version does not upload this information to the developer or use it to create an online account.

Deleting the app normally removes its local app data, subject to any device backup and restoration features controlled by Apple and your device settings.

2. Optional analytics

Goodness uses Google Firebase Analytics only if you choose "Share Analytics." Analytics is disabled before you make that choice.

When enabled, Firebase Analytics may automatically collect information such as:

- app interactions and usage events, including app opens, sessions, screen activity, and engagement;
- app and device information, such as app version, device model, operating-system version, language, and general technical information;
- installation or device-related identifiers used by Firebase Analytics; and
- diagnostic and approximate location information derived from technical data such as an IP address, where processed by the service.

The developer uses this information only to understand aggregate use of Goodness and improve the app. The app does not provide Firebase with your profile details, email address, name, photos, game progress, Firebase Authentication identifier, or Game Center identifier. The developer does not use analytics for advertising or cross-app tracking.

You can decline analytics and continue using the app. You can also enable or disable analytics later using "Share Analytics" in the Information screen.

3. Camera and photos

Goodness requests camera access only when you choose to take a photo. You may also select a photo using Apple's system photo picker. Selected or captured photos are stored locally with your profile or task history. Goodness does not upload them to the developer or Firebase.

4. Service provider and disclosure

If analytics is enabled, analytics data is processed by Google as the provider of Firebase Analytics. Google's handling of this data is governed by its applicable terms and privacy documentation, including the [Google Privacy Policy](#) and [Firebase privacy and security information](#).

Goodness does not sell personal information. The developer does not share app data with advertisers or data brokers. Information may be disclosed if required by law or reasonably necessary to protect legal rights, safety, or the security of the app.

5. Retention and security

Local information remains on your device until you remove it through the app, reset the relevant content, or delete the app, subject to Apple-controlled backups. Analytics data is retained according to the retention settings configured for Firebase Analytics and Google's applicable policies; aggregated or de-identified reporting may be retained longer.

Reasonable safeguards are used, but no device, storage system, or internet transmission can be guaranteed completely secure.

6. Your choices and requests

- Use the app without enabling analytics.
- Withdraw or grant analytics permission at any time in the Information screen.
- Remove locally stored information by deleting or changing it in the app where controls are available, or by deleting the app.
- Contact the developer to ask a privacy question or request deletion of any information held by the developer. The developer may need reasonable information to locate and verify a request.

7. Children

Goodness is not intended to collect personal information from children through an account or profile service. Parents or guardians should supervise a child's use where required by applicable law and should not enable optional analytics unless they consider it appropriate.

8. Changes to this policy

This policy may be updated when the app or legal requirements change. The current version and effective date will be made available through the app. Material changes will be communicated where required by law.

9. Contact

Questions, privacy requests, or concerns may be sent to goodnessapp@georgiitroshin.com.
