Basic Infos

Website: <http://www.kompiajaib.com>

Title: **Kompi Ajaib | All About Sharing.**

Headings

H1: **Zero**, that is **Really Bad**

Warning: Make sure you have at least one H1 tag: It represent the headline of your content/website.

H2: **11**, that is **Good**: Now try to **maintain the same H1 (if used) or the website title subject** in this heading!

H3: **9**, that is **Good**, not fundamental but remember that if you are not going to use **H2** at least use some **H3** headings!

Tips: **H1**, **H2** and **H3** are Headings. If you can maintain the *same subject* in all the used Headings the **search engine** will have a better idea of what is crawling. For Example: If your page talk about **hosting** try to repeat **hosting** in every used Heading.
