

AUTHOR'S PLEDGE

I, alongside other writers, am concerned about the destruction of ancient forests.

I believe that the publishing industry, through the paper it uses, contributes towards ancient forest destruction. I believe this could be prevented if the publishers committed to using ancient forest friendly paper. I would also like to see publishers actively engage with suppliers to source their paper from environmentally and socially responsible sources such as those independently certified by the Forest Stewardship Council (FSC) standards and/or recycled paper made from post consumer waste.

By signing the author's pledge, I undertake to pursue the following goals:

- To try to ensure my publisher prints my future books on ancient forest friendly paper.
- To engage with publishers, as part of this author's network, to encourage them to stop using paper derived from ancient forests and encourage them to use FSC and/or recycled paper.
- To try to insert a clause into my contract to ensure my future books are printed on ancient forest friendly paper.
