MARKS & SPENCER POSITION ON GM ANIMAL FEEDS -UPDATE

Further to your recent re-launch of the Shopper's Guide to GM and our subsequent telephone conversations, I would like to confirm that :-

1. All Marks & Spencer fresh milk is produced by herds fed on a non-GM diet.
2. All Marks & Spencer farmed fish (including Salmon, Warm Water Prawns, Trout and Sea Bass) is fed on a non-GM diet. .

In order to help, I attach the UPC's relating to prawns, trout and Sea Bass. I believe you already have the fresh milk ones from the e-mail Sue Bell sent to you on 11 th July.

I will keep you periodically updated on progress at our end. Specifically, I would welcome a discussion prior to our visit to Brazil in October. I will ask Mike Barry to set this up.

Should you require any further information relating to our position on GM animal feed, please do not hesitate to contact me.

Yours sincerely
PAUL WILLGOSS
