Dear (MP name)

As one of your constituents, I'm writing to express my concerns about the possibility of fracking heading to (county name/the UK).

Fracking is (Edit this to make it personal to you, using your own words - so that not all letters not all letters will read the same. This way they will have more impact. Use some the facts beneath and add your own if you wish.)

- Disruptive, causing traffic and noise pollution. Quiet rural towns and villages could be ruined by fracking sites, with up to 250 truck journeys a day occurring from one site alone.
- Damaging. Despite safeguards being placed in the law, our national parks and drinking water are still at risk.
- Putting our stunning countryside at risk, as fracking is allowed under national parks. These areas of natural beauty could end up surrounded by fracking rigs.
- Destructive. The wildlife in our countryside, and any areas that are fracked, is at risk because of increased industrialisation of those areas and water contamination.
- Climate-wrecking. We need to leave fossil fuels in the ground if we are to avoid the worse effects of climate change. Fracking won't wean us off fossil fuels.

Considering all the potential risks and uncertain benefits, I urge you to use your role in parliament to take a stand against fracking and support local opposition to this destructive and unwanted energy source.

As a concerned local resident of (constituency name), I look forward to your response and urge you to declare your stance on fracking, and what your actions will be to address these concerns.

Yours Sincerely,

(Signature)
