Tesla provides industry-leading warranties to ensure your solar panel system is producing energy for the long term. Tesla strives to provide you with the highest quality equipment, so we rigorously vet the suppliers we partner with.

## Solar Panels

Solar panels are covered by a warranty from their manufacturer. This warranty includes at least 12 years for workmanship and a guarantee of at least 80% nameplate power capacity after 25 years. To learn more about the equipment we use, check out our equipment page. At your request Tesla will make any claim under the manufacturer's warranty on your behalf and perform any related labor at our cost.

## Inverter

The inverter is covered by a warranty from their manufacturer. This warranty will cover defects for at least 10 years. To learn more about the equipment we use, check out our equipment page. At your request, Tesla will make any claim under the manufacturer's warranty on your behalf and perform any related labor at our cost.

## Workmanship

Tesla provides a workmanship warranty which ensures our installation workmanship will be free from defects for 20 years from the date your products are installed. Tesla warrants that all roof penetrations we make will be watertight for at least 10 years, or as specified within your contract. Tesla's roof warranty will be extended if you have an existing installation warranty or new home builder performance standard for your roof that is longer than 10 years.
