

Mobile phones can be effective tools in countries with restricted access.

Please Pray...

- For lives to be transformed as people listen to GRN recordings
- That people around the world would learn about 5fish and use it well
- For Christians to tell others about 5fish
- For GRN recordings to be used wherever they are useful
- For James as he writes up the 5fish specifications
- For volunteers to make 5fish available on more devices and to test it

About GRN

GRN has produced audio recordings of the gospel in over 6,000 languages. Our goal is to have the gospel in EVERY language and dialect on earth, so that everyone has the opportunity to hear the good news of Jesus in their own heart language. Find out more: www.globalrecordings.net/auinfo

Subscribe

'Every Language' is a free monthly publication of GRN Australia. To subscribe please call us, or visit here: www.globalrecordings.net/ausubscribe

Represent GRN in your church

Help raise awareness of GRN by representing us in your church. To find out more call us, or visit here: www.globalrecordings.net/aurep

Use our Resources

GRN materials are used worldwide by missionaries and local churches. If you are involved in missions, please call us to discuss how we can support your ministry.

Donate

GRN is a non-profit missionary organisation, which operates primarily from the gifts of God's people. You can give online here:

Using 5fish

EVERY LANGUAGE

Going fishing?

Just imagine that you are sitting in the doctor's waiting room. You strike up a conversation with the person beside you. She is very friendly but doesn't speak enough English for the conversation to go very far. What can you do?

Or maybe you have travelled overseas and have a stumbling interaction with a local person. You would love to be able to communicate something significant with them, but can't. What can you do?

You can use 5fish! Take out your phone and go to 5fish.mobi (see the end of this article for instructions on how to do this). There you will find GRN's recordings in over 5,000 different languages and dialects ready for you to download and play for that person right now.

You can listen together on your phone. It's very likely that the person will be able to download the recording onto their own phone, or you can send it directly from your phone to theirs, so they can listen at their leisure.

Once you have a recording on your phone you can share it without internet access. So if you know that you are going into an area where a particular language is spoken, you can download recordings in that language onto your phone. You can then play the recordings or transfer them to other phones without internet access.

GRN has developed 5fish so that people can have easy access to the Good News about Jesus in their own language. You will even find English materials there for people who don't read.

5fish.mobi

We want to get word out, all over the world, about 5fish. Please pray with us for people who will discover 5fish in different countries and tell people about it. Why do we ask that?

Revelation chapter five says that Jesus was slaughtered and by His blood He ransomed saints from every tribe and language and people and nation for God.

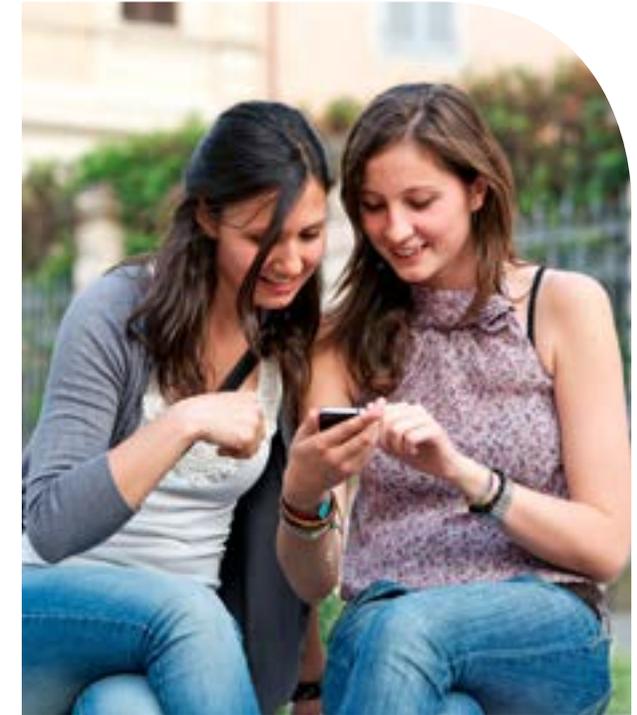

GRN's contribution to God's plan is to tell the story of Jesus in every language. We want to fulfil our mission as well as we can, and so we want as many people as possible hearing the message. Romans chapter ten tells us that faith comes from hearing, and hearing comes through the word of Christ. 5fish is a new way that people can hear that word.

Using 5fish

All phones with internet access can use 5fish. Just put 5fish.mobi into your internet browser and the mobile website will come up.

Older style mobile phones may not be able to use our apps, but they can usually still access the 5fish.mobi website and play the audio files.

You can share the gospel with your mobile phone.

An Android app is available from the Google Play Store. We hope to have an iOS app available soon. (We are looking for volunteer developers to make the app available on other devices).

You can search for the language or set the country. Once you select a language the recordings available in that language will appear. See this video:

<https://www.youtube.com/watch?v=GkijGxjcCCo>

How did 5fish come about?

5fish has been developed by James Thomas (Australian staff member) and an army of volunteers. More recently James has been joined by Franz Brosch (Android developer) and David Nolan (iOS developer) - both are part-time Australian staff members. We are very thankful for everyone who has played a part developing 5fish.
