

Tumi, the talking tiger

Tumi is every child's soft toy tiger buddy

Tumi Tiger is a tool to assist with:

Trauma Recovery

Experience shows that stuffed animals can bring physical and emotional comfort to children and adults who have gone through trauma and pain. Tumi can be a buddy to help children of poverty, disease, and disaster to feel loved.

Life Orientation

Tumi shares important knowledge, values and skills that are essential for the personal, social, intellectual, emotional and physical growth of ALL our children. Every child can benefit from a friendship with Tumi.

Tumi tiger is:

Simple and Practical

A special pocket/pouch in each animal holds the audio player that is Tumi's voice box. The controls are easy for a child to use and give access to all Tumi's chats. The player is solar rechargeable and can be recharged hundreds of times.

Comprehensive

Tumi's stories are carefully developed to make a long-lasting impact on children.

The child learns and is guided through Tumi's adventures and mistakes on crucial matters. Nobody's perrrfect, right? Tumi views, addresses and engages the child as a playmate and a tiger as well (or a human 'cub').

Child-focused/child safe

The tiger soft toy is child certified, as well as the audio player device. These soft toys are washable, hypo-allergenic and passed all the safety tests.

Suitable for children of all ages

The age of children can benefit from this tool. We have from 2 year olds up to 12 year olds who appreciate a Tumi hug while listening to the tiger tales.

A Team Player

Tumi has proven to be effective serving as a co-member of staff on medical teams, in police trauma rooms, counsellors or children's homes and child hospices.

Joint project

This is a joint project with Global Recordings Network Southern Africa (GRNSA) as audio producer, partnering with Home of Creativity.

Claude Vosloo from Home of Creativity wrote the script.

Megavoice designed and manufactured the animal.
