

Grow with Google

Justice-Impacted Community Partners

These 67 organizations are equipping people who have been impacted by the justice system with digital skills that will help them get a job or start a business.

Learn More About Our Partners

In June 2022, we launched the \$4 million Grow with Google Fund for Justice-Impacted Communities to enable organizations to teach digital skills to people who have been impacted by the justice system. More than 500 organizations applied, and we selected over 65 that have a proven track record of supporting justice-impacted communities and have the capacity to provide digital skills training at scale. Together with these partners, we are equipping people who have been impacted by the justice system with digital skills that will help them get a job or start a business.

In this resource, you can learn more about each of our partners and the work they're doing to bring digital skills training to the communities they serve.

If you work for an organization that serves the justice-impacted community, [visit our webpage](#) to learn more about our curriculum and how to implement it.

Learn More About Our Partners
