ABOUT COURSE

Gurcademy

The Web Development Course at **Gurcademy** is a beginner-focused, hands-on training program designed for students who want to learn how websites are built and start their journey in the tech industry. This course focuses on frontend web development, where students learn to design, build, and deploy modern, responsive websites used by real businesses.

This program is ideal for **students with no technical or coding background**. The course starts from absolute basics and gradually builds confidence through **practical exercises**, **real projects**, and industry-relevant tools. Instead of memorizing theory, students learn by building real websites from day one.

By the end of the course, learners will be able to create professional **websites**, understand how the web works, and take their first step toward careers such as **Web Developer**, **Frontend Developer**, or **UI Developer**.

CLASS STRUCTURE

- 5 days per week
- 2 hours per day
- 240+ hours of live instructor-led training
- Assignments, assessments & real projects included

ELIGIBILITY

- 10th pass students
- College students & graduates
- Beginners interested in Coding

No coding background or Degree required

TECHNOLOGY STACK

Gurcademy

HTML – The structure of a web page

CSS – Styling language for layouts and responsive design

JavaScript –Adds logic and interactivity to web pages

Domain Basics – Understanding website addresses

Flexbox & Grid – Layout systems for arranging content

Responsive Design – Makes websites work on all devices

DOM Manipulation – Dynamically updating website content

MongoDB – A database for storing application data

Git Basics – Track code changes

Web Hosting – Making websites live on the internet

REST APIs – Communication between Frontend & Backend

Middleware – Code that runs between request and response

MONTH-WISE CURRICULUM

Gurcademy

Module 1 – Web Fundamentals

Students start by understanding how the internet works, what websites are, and how browsers display web pages.

This module **builds clarity before coding begins.**

Outcome:
Understand the foundation of the web and website structure.

Module 2 – HTML & CSS

Learn to create structured pages using HTML and **design them using CSS**.

Topics include layouts, **colors**, **typography**, and **responsive design** for different screen sizes.

Outcome:
Design clean, responsive, multi-page websites.

Module 3 – JavaScript Basics

This module introduces programming fundamentals using JavaScript.

Students learn variables, conditions, loops, functions, and how to make websites interactive.

Outcome:
Add logic, animations, and user interaction to websites.

Module 4 – Modern UI Development

Learn modern styling techniques using Flexbox, Grid, and CSS frameworks.
Focus is placed on real-world layouts such as landing pages and business websites.

Outcome:
Build visually appealing, industry-standard UI designs.

Module 5 – Projects & Deployment

Students apply everything they have learned by building:

- A personal portfolio website
- A business or landing page
- One self-chosen mini project

Students also learn how to deploy websites live and showcase their work professionally.

Outcome:
Graduate with live, shareable web projects.

(BIKRAM CHOWK TO BHAGWATI NAGAR ROAD)

INTERNSHIP & PLACEMENT OPPORTUNITY

At the end of the course, Gurcademy conducts a comprehensive evaluation exam that tests:

- Core programming concepts
- Web development skills
- Problem-solving ability
- Project understanding

Guaranteed Internship

- Students who clear the final assessment exam are guaranteed an internship opportunity
- Internships focus on real project work, teamwork, and professional exposure
- Internships may be offered at Gurcademy or with partner organizations

Placement Assistance

- Placement opportunities are performance-based
- Selection depends on:
  - Exam score
  - Project quality
  - Internship performance
- Gurcademy provides:
  - Resume & portfolio guidance
  - Interview preparation
  - Job referral support

Note: Internship is guaranteed upon clearing the exam. Placement depends on individual performance and outcomes.

“A Degree cannot guarantee a job, but a skill can.”

FINAL OUTCOME

Gurcademy

BY THE END OF THIS PROGRAM,

Students will:

- Build responsive websites independently
- Understand real-world web workflows
- Have live projects to showcase
- Gain confidence to pursue advanced courses like Full Stack Development
