Nest Pro

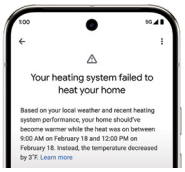

Expand your business with Google Nest.

With a full ecosystem of products designed to work together, the Nest Pro program can help you boost your bottom line and connect to customers all year round.

Match more customer budgets with premium and wallet-friendly thermostat options.

Build long-term customer relationships with HVAC System Health Monitor, included on all Nest thermostats.[1]

Save valuable time with the fastest installation and easiest servicing yet on a Nest thermostat.[2]

Become a Nest Pro at g.co/nestpro

1 List of eligible HVAC systems is available at g.co/nest/hvac-monitoring. Alerts can notify users of a potential issue with an eligible HVAC system. They're meant to provide helpful information, not an endorsement, representation, or warranty of any kind about the health of an HVAC system. HVAC System Health Monitor is only available to registered Nest Pros. A person with legal signing authority for the Pro company can register for a Pro ID at g.co/nestpro. HVAC system alerts will surface the information of a Pro company if the Pro company is enrolled in HVAC System Health Monitor and a Pro ID is entered on the thermostat. 2 Compared to earlier software versions of the Nest Learning Thermostat (4th gen).

Nest Pro

	Nest Learning Thermostat (4th gen)	Nest Thermostat
Compatibility	Up to: 3H/3C conventional 5H/3C heat pump/hybrid heating system	Up to: 2H/1C or 1H/2C conventional 1H/1C heat pump/hybrid heat

Energy-saving features[2]	Smart Schedule Home/Away Routines Adaptive Eco Adaptive Comfort Natural heating and cooling Smart Ventilation[3] Seasonal Savings Heat Pump Balance Humidity Helper[4] Energy Shift[5]	Savings Finder Home/Away Routines Eco Temps - - - Seasonal Savings Heat Pump Balance Cool to Dry Energy Shift[5]
Design	Available in multiple colors High-res color display Dynamic Farsight	Available in multiple colors Mirrored display

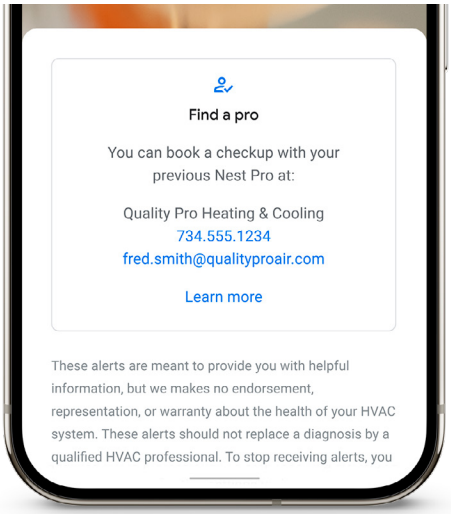

1 Requires compatible HVAC ventilation system and Google Home app. 2 Google Home app required for most energy saving features. 3 Smart Ventilation requires compatible HVAC ventilation system. 4 Humidity Helper requires air conditioner, heat pump, or central humidifier or dehumidifier. 5 Adjustments are primarily designed to shift the timing of electricity usage from your heating and cooling, but these shifts typically result in net energy savings.

Ditch the stickers. Not the leads.

HVAC System Health Monitor (previously HVAC monitoring) is a popular feature with customers – and a big opportunity for your business.[1] It looks out for issues, tracks performance over time, and lets customers know something might be wrong.[2] So it's easy for them to get in touch when there are issues, big or small.[1]

Enter your Nest Pro ID on the device or in the Google Home app at installation to make sure your contact info appears in the alert – and unlock even more benefits.[2,3]

One-tap contact routes high-priority service calls directly to your business.[3]

Grow your bottom line with the brand customers know and trust.

Nest thermostats work seamlessly with products like Google Home smart speakers and hubs for easy bundling. And the Google Home app works with Google and Matter devices, plus thousands of other brands you're already installing. Add them to your portfolio to open new revenue streams and keep customers coming back for more.
