## 6A Neighbourhood Centre Zone — NCZ

### NZC — PREC1-PSP: Neighbourhood Centre Zone - Peacocke

#### NZC — PREC1-PSP: PURPOSE

Business resources commonly group around a series of centres in Hamilton and include activities such as retailing, offices, business and financial services, manufacturing, warehousing and associated parking, storage and display areas. These areas and the infrastructure that serves them are significant public and private resources and influence the urban form and function of all parts of the City.

The grouping of business activities into centres provides an environment that will draw in other business and facilities. This agglomeration results in productivity gains arising from economies of scale and efficiencies of inter-connectedness.

The focus of the business centres' hierarchy is to manage existing centres to ensure they retain and enhance their function, vitality, viability and amenity as focal points for a diverse range of activities needed by the community. Ongoing public investment is a significant element in any centres-based strategy.

A centre is a cohesive or integrated set (cluster) of diverse land-use (business) activities, characterised by high pedestrian levels in a high-amenity public environment and supported by efficient and accessible passenger public transport, infrastructure and services.

A business centres' hierarchy has been developed that comprises six tiers. The overall aim being to re-establish the primacy of the Hamilton Central City and define its relationship with the sub-regional centres and suburban centres, and other centres.

The Neighbourhood Centre Zone (NCZ) provides for small scale commercial and community activities service that service the needs of the immediate residential neighbourhood.
