## 6B Local Centre Zone — LCZ

### LCZ — PREC1-PSP: Local Centre Zone Peacocke Precinct

#### LCZ — PREC1-PSP: PURPOSE

Business resources commonly group around a series of centres in Hamilton and include activities such as retailing, offices, business and financial services, manufacturing, warehousing and associated parking, storage and display areas. These areas and the infrastructure that serves them are significant public and private resources and influence the urban form and function of all parts of the City.

The grouping of business activities into centres provides an environment that will draw in other business and facilities. This agglomeration results in productivity gains arising from economies of scale and efficiencies of inter-connectedness.

The focus of the business centres' hierarchy is to manage existing centres to ensure they retain and enhance their function, vitality, viability and amenity as focal points for a diverse range of activities needed by the community. Ongoing public investment is a significant element in any centres-based strategy.

A centre is a cohesive or integrated set (cluster) of diverse land-use (business) activities, characterised by high pedestrian levels in a high-amenity public environment and supported by efficient and accessible passenger public transport, infrastructure and services.

Zoning and rule provisions provide for a range of activities, scales and formats appropriate to managing the effects of development of business centres, the principally retail role of the sub-regional centres, the community, mixed use and pedestrian focus of the suburban centres, the neighbourhood function of local facilities, the supporting role of commercial fringe areas and the peak visitor demands associated with visitor facilities.

The commercial and community hub of the Peacocke Structure Plan is located in the Peacocke Local Centre. It is anticipated that this centre will include a supermarket and a range of other commercial activities that provide for the needs and wellbeing of the community. It is important that the centre is easy to access on foot and on bike and is well serviced by public transport. The built environment should focus on the pedestrian and create active street frontages that are universally accessible.
