6A Neighbourhood Centre Zone – NCZ

NZC NCZ (53.37) - PREC1-PSP: Neighbourhood Centre Zone - Peacocke

Provisions that are not tracked changed (insertions <u>underlined</u>, deletions <u>struck out</u>), have been transferred from the Hamilton Operative District Plan 2017 under s58I of the RMA for the purposes of complying with the format requirement of the National Planning Standards.

The following provisions have legal Effect under Section 86B (3) of the RMA

NZC NCZ (53.37) - PREC1-PSP: ISSUES

Business resources commonly group around a series of centres in Hamilton and include activities such as retailing, offices, business and financial services, manufacturing, warehousing and associated parking, storage and display areas. These areas and the infrastructure that serves them are significant public and private resources and influence the urban form and function of all parts of the City.

The grouping of business activities into centres provides an environment that will draw in other business and facilities. This agglomeration results in productivity gains arising from economies of scale and efficiencies of inter-connectedness.

The focus of the business centres' hierarchy is to manage existing centres to ensure they retain and enhance their function, vitality, viability and amenity as focal points for a diverse range of activities needed by the community. Ongoing public investment is a significant element in any centres-based strategy.

A centre is a cohesive or integrated set (cluster) of diverse land-use (business) activities, characterised by high pedestrian levels in a high-amenity public environment and supported by efficient and accessible passenger transport, infrastructure and services.

A business centres' hierarchy has been developed that comprises six tiers. The overall aim being to reestablish the primacy of the Hamilton Central City and define its relationship with the sub-regional centres and suburban centres, and other centres.

The Neighbourhood Centre Zone (NCZ) provides for small scale commercial and community activities service that service the needs of the immediate residential neighbourhood.

NZC-NCZ - PREC1-PSP: R4849 Service Areas

- 1) Any building shall provide service areas as follows.
 - a) At least one service area of not less than 10m² or 1% of the gross floor area of the building, whichever is the greater.
 - b) Any additional service areas shall not:
 - i. Be less than 5m²
 - ii. Have a minimum dimension of less than 2.5m
 - c) Any outdoor service area shall be maintained with an all-weather, dust-free surface.
 - d) A service area may be located within a building provided that it is separately partitioned with an exterior door directly accessible by service vehicles.
 - e) Any service area shall not encroach on to areas required by this District Plan for other purposes (e.g. parking, loading, landscaping and screening).
 - f) Be located away from public view or otherwise screened by fencing and landscaping.

NZC-NCZ - PREC1-PSP: R4950 Outdoor Storage

- 1) Any outdoor storage area used for the storage of goods or materials shall:
 - a) Be laid out and used in a manner that does not conflict with vehicle access.
 - b) Be maintained with an all-weather, dust-free surface.
 - c) Be located outside of the front building line and screened from public view.
 - d) Not encroach on areas required by this District Plan for other purposes (e.g. parking, loading, landscaping and screening).

NZC-NCZ - PREC1-PSP: R5051 Residential Development

	<u>1)</u>	Only one ancillary residential unit is allowed per site.	
	<u>2)</u>	Except for providing an entrance, no residential activities shall be undertaken at ground-floor level.	
- }			

- 3) The following standards shall apply to residential units, including apartments above ground floor and residential centres. Unless specifically noted, they do not apply to visitor accommodation.
- 4) Density (Minimum Number of Residential Units Required Per Site) (53.45)
 - a) Minimum densities within the Neighbourhood Centre Zone shall be 30 residential units per hectare based on net site area. This is to be calculated in accordance with the formula below:

0.003 residential units per 1m2 of site area

Example

For a site which has an area of 4000m₂, the minimum number of residential units required under this rule would be 12. This is calculated by multiplying the site area (4000m₂) by 0.003

b) Where mixed-use is provided for within a development (e.g. office or retail with residential above), the density requirements of Rule R71-4 a) shall be applied on a pro-rata basis relative to the percentage of gross floor area of the development that is residential (e.g. where 40% of the gross floor area of a development is comprised of residential activities, then 40% of the total minimum number of residential units calculated under Rule R71-4 is the minimum number of residential units required to be provided.

45) Outdoor Living Areas

- a) <u>Each residential unit, except for when a communal area is provided, shall be provided with an outdoor living area that is:</u>
 - For the exclusive use of each residential unit.
 - Readily accessible from a living area inside the residential unit.
