The assessment of this criterion can be directly influenced by the assessment against the 'consistency' criteria; if an area is assessed as being not consistent it cannot be considered to be representative.

The assessment for this criterion is scored as following:

- Green if the area is representative with no or very little change.
- Orange if it is partly representative but has seen some change.
- Red where the area is not representative, whether as originally built or currently existing due to change.

Each of the physical and visual qualities is considered in turn and scored as following:

- Green with 1 point if the area shows the consistency of the criteria.
- Orange with 0.5 point if the area shows no consistency on the criteria or there has been some change in the area which has affected its consistency of the criteria.
- Red with zero point if the area shows no consistent on the criteria

3. Comment – a short comment is provided for each street, generally relating to the consistency criteria.

4. Conclusion Consistency Criteria – an overall score is provided for each street based upon the sum of the scores for each consistency criterion.
