

Vail Williams LLP is a leading UK real estate adviser. Despite the challenging times we are continuing to expand, and we have two new and exciting opportunities in our Building Consultancy team.

Woking, Surrey

Our success in the past 12 months has created a need for **two new positions** based in our vibrant and busy Woking office. We are seeking an Associate and a Chartered Surveyor/Senior Chartered Surveyor. The posts will both involve all aspects of commercial building consultancy and you will join the larger, regionally based, successful and growing building consultancy team.

Associate

You will be expected to lead the new Building Consultancy team in the Woking office. The ability to work closely with colleagues in other disciplines to deliver a seamless service to our clients is important. Business development skills are also key as you will be expected to be an ambassador for the company, developing client relationships, attracting new commissions, and delivering the highest level of service. An outward thinking candidate is required to assist with the continued growth of Vail Williams.

You will be highly organised and entrepreneurial with a proven track record in Building Surveying/Project Management and will be MRICS qualified and are currently working at a senior level elsewhere.

Surveyor/Senior Surveyor

You will be joining the new Building Consultancy team in Woking. An outgoing personality is key as you will be expected to work closely with colleagues in building consultancy and other disciplines. Our clients are a diverse and interesting mix of private companies, PLC's, and public sector bodies. The work is varied and interesting and ranges from surveys and schedules, through contract administration and project management to dilapidations.

You will be organised and motivated, needing no direct supervision with a proven track record in Commercial Building Surveying/Project Management and will be MRICS qualified.

We offer highly competitive salaries and comprehensive benefit packages together with an excellent working environment and focussed career development. Further details are available upon request.
