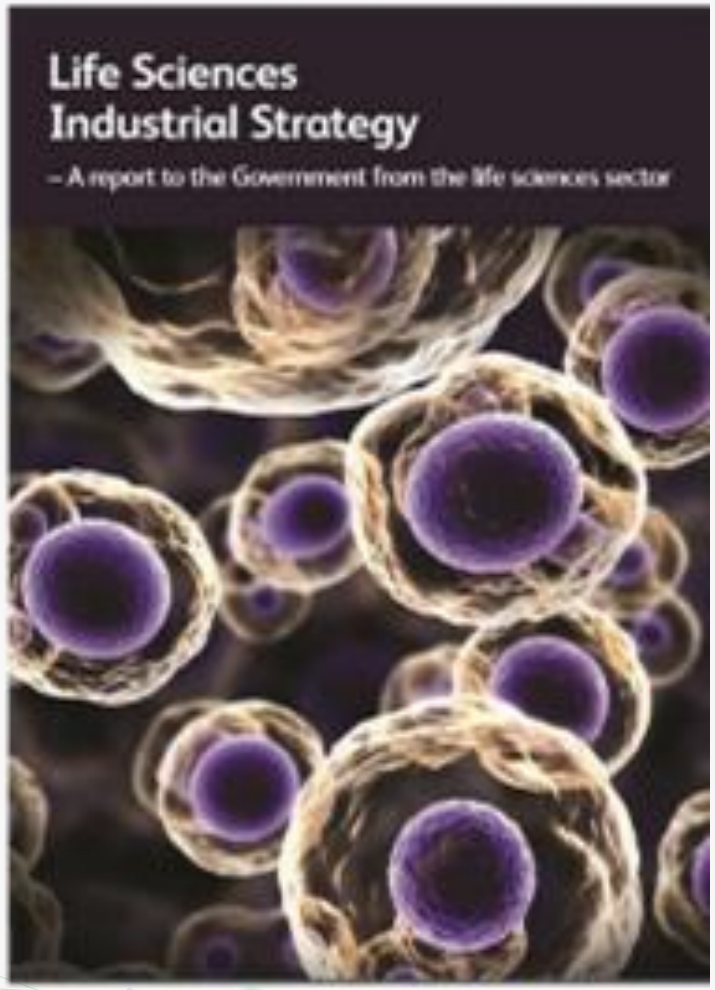
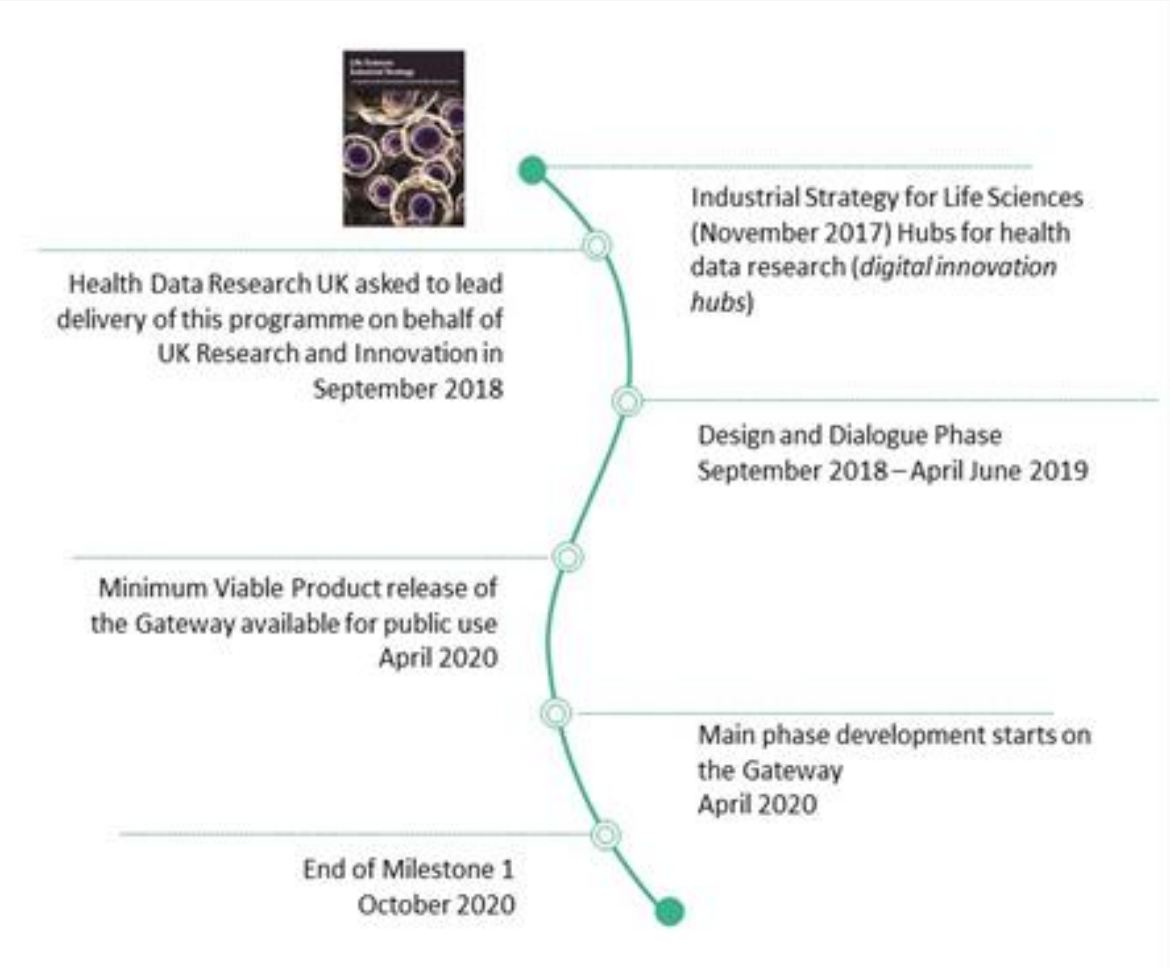
The Evolution of the Gateway

Gerry Reilly
Technologist in Residence, Health Data Research UK

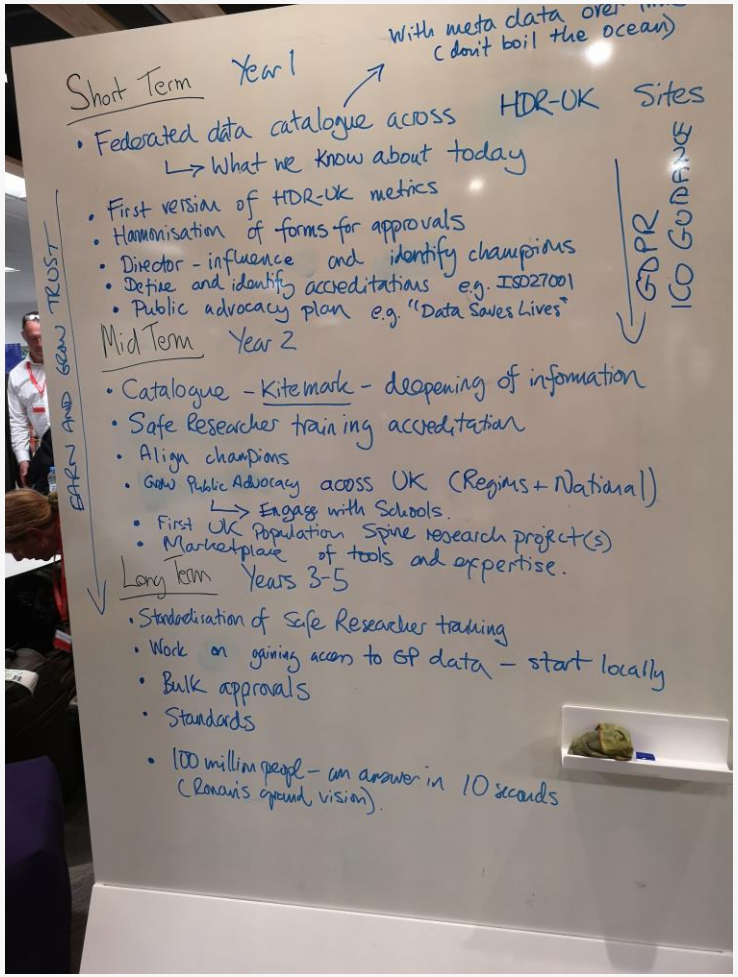
19/08/2022

Where we started – the Life Science Sector Deal 2017



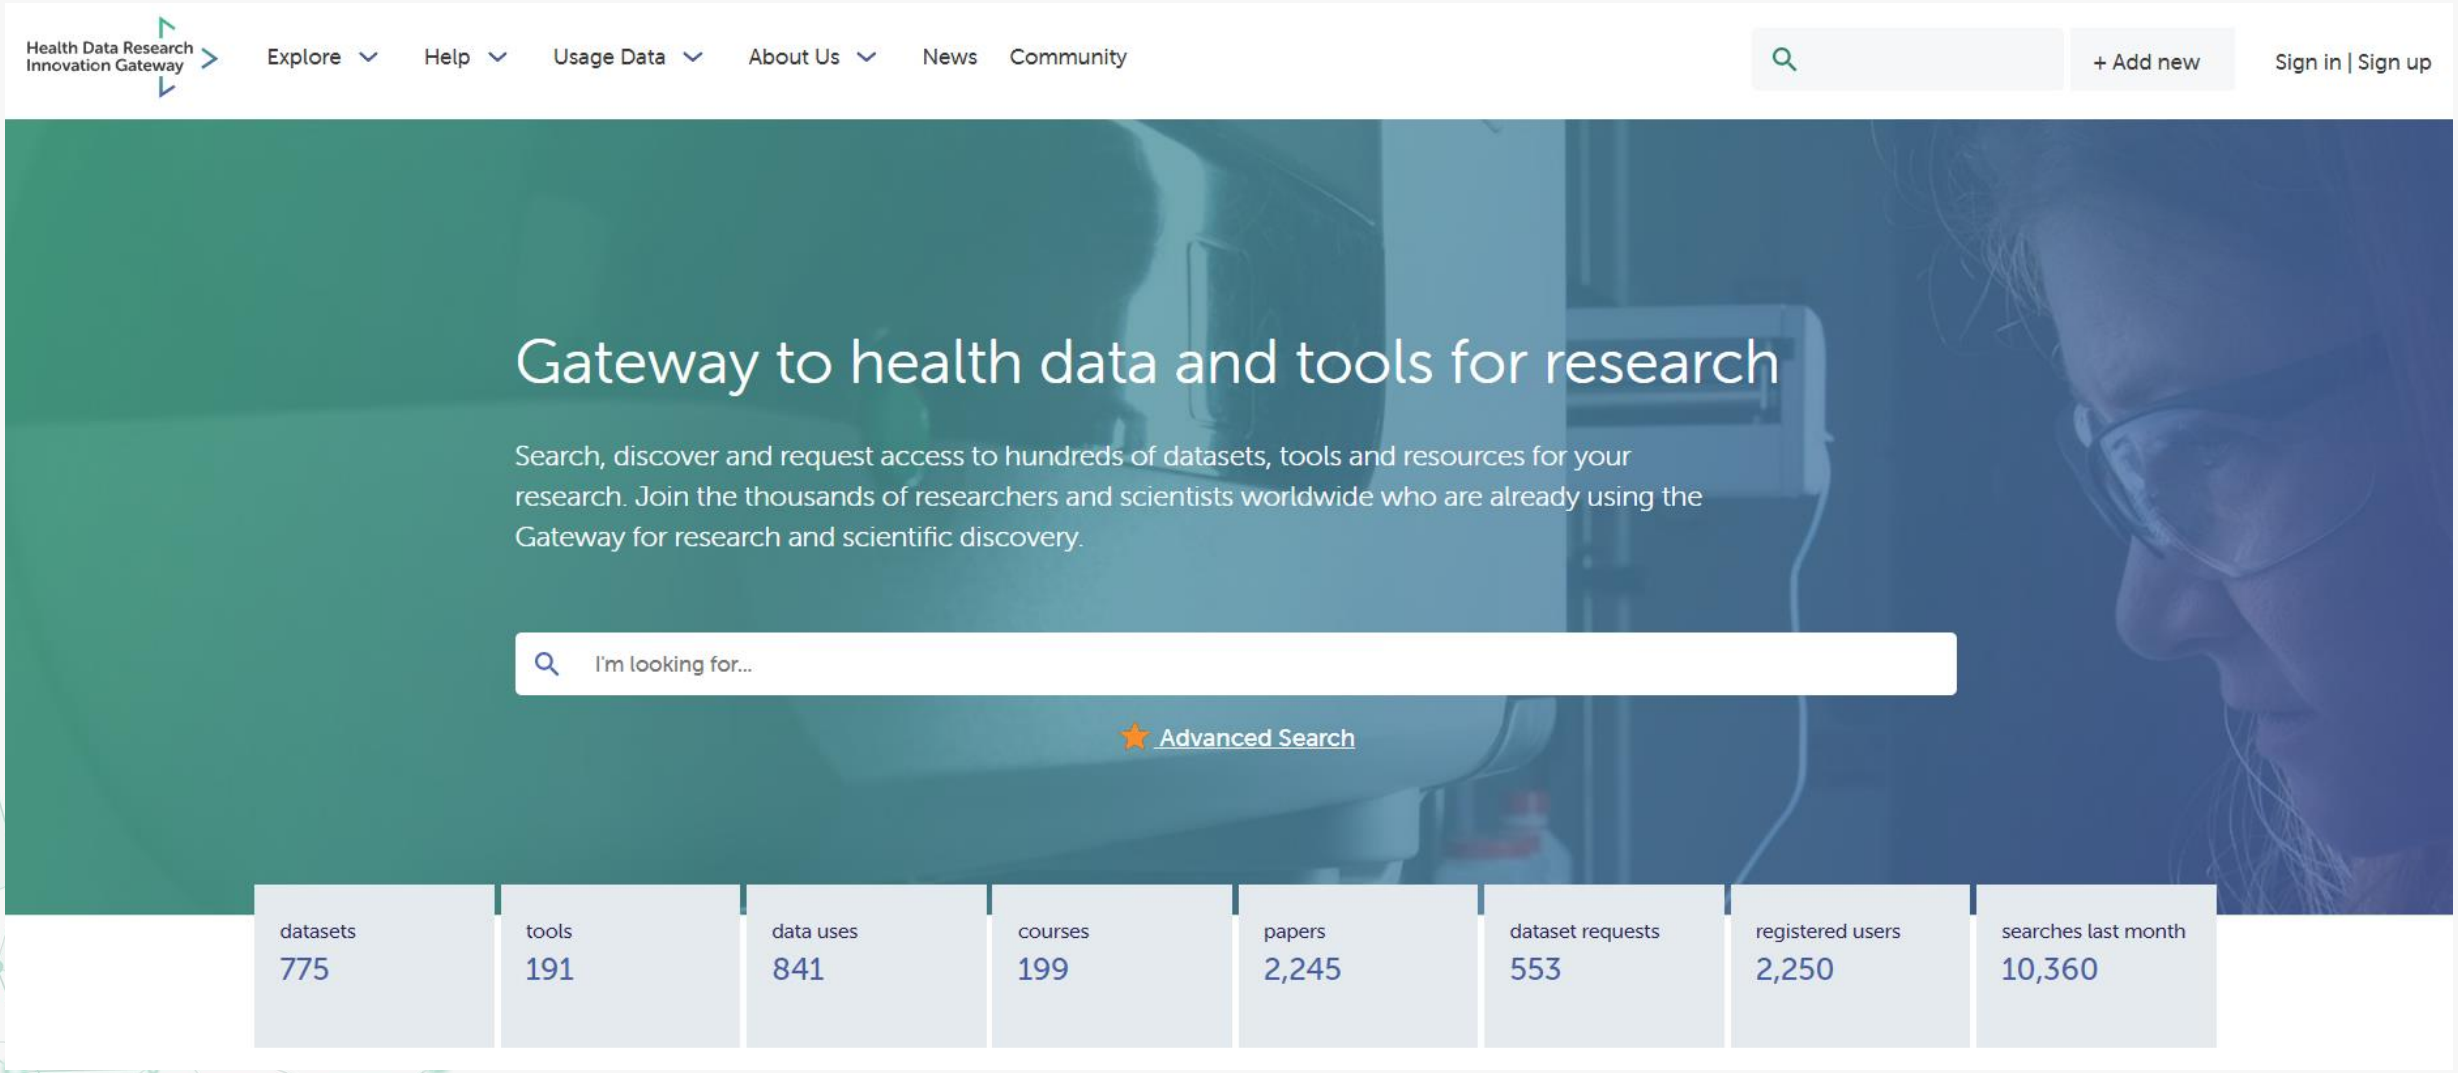


September 2018 – Design Thinking Workshop at IBM Hursley



Today

HDRUK
Health Data Research UK



and how we move to….

1. Services and APIs	Provide a set of services and open APIs to enable federated analysis
2. Community, scale and adoption	Convene a vibrant open-source development community Provide the Innovation Gateway as a tool for broader adoption Reuse and white-label
3. Unifying Programmes	Bring together the existing programmes Harmonise the services and programmes HDR UK and our partners offer Provide consistent Governance processes supporting all programmes
4. Underpinning our Research Driver Programmes	Engage Research Driver Programmes to ensure use case led development

Tomorrow – Impact in 5 Years

Patients and Public

The end-to-end use of data will be open and transparent from discovery to dissemination

Patients and public represented in all aspects of Technology Services Ecosystem development and governance

Researchers

New services that allow for the federated analysis of data across health relevant data sets across the UK

A community will be leading open development of those services, providing a sustainable infrastructure for QQ3 and beyond
