

Injirta Madaxa

Head Lice

Head lice are tiny bugs about the size of a sesame seed. They live in the hair and bite the scalp to suck blood. They do not fly or jump, but they can move very fast. This makes it hard to find them in the hair.

Nits are the eggs of the lice. They look like yellowish, white, or brown dandruff. Head lice attach their eggs to shafts of hair with a waterproof “glue”. The eggs are laid close to the scalp. Look for eggs at the back of the neck and behind the ears. These eggs cannot be washed out or brushed out of the hair. They must be picked out one at a time.

Causes

Lice can spread quickly from one person to another if the persons:

- Share hats, scarves, combs, brushes, hair clips or barrettes, hair bands, helmets or clothing
- Lie on the same bed, couch, or carpet
- Play close together
- Use items stored in closets or lockers that have the lice or eggs on them

Injirta madaxa waa dhilqo yaryar ee qiyaastii cabirka miraha sisinta. Waxay ku noolyihiin timaha oo waxay qaniinaan madaxa si ay u dhuuqaan dhiiga. Ma buubaan ama ma buudaan, laakin dhaqso ayay dhaqaaqi karaan. Tani waxay adkeysaa in laga helo timaha.

Qanjiciilka waa ukunta injirta. Waxay u egyihiin qolof jaale, cadaan, ama baroon ah. Injirta madaxa waxay ku lifaaqaan ukumahooda jiridka timaha ee leh “koolada” biyaha. Signs

- Itching or tickling feeling that something is moving around or tickling the head.
- Red marks or sores on the scalp sometimes with drainage and crusting. These are often found behind the ears or on the back of the neck. If the skin is scratched open, the sores can get infected and must be treated by your doctor.
- Scratching the head. Sometimes it takes weeks for a child to start scratching.

Treatment

Your child's doctor can suggest a medicated lice shampoo, cream or lotion. You can buy lice products at your local pharmacy without a prescription. Some of the products will have a special nit comb in the package or you can buy one separately. This special comb can help find and remove eggs. It is very important to remove all of the lice eggs and to treat all of your family members.

Special Warnings about Lice Products

- If you or your child is allergic to ragweed or chrysanthemums, check with your doctor or pharmacist before using any brand of medicated rinse or shampoo. The active ingredient in some brands such as Rid, Pronto, and A-200 could cause a serious allergic reaction.
