

Lalabada iyo Mataga Waqtiga Uurka

Nausea and Vomiting During Pregnancy

Nausea and vomiting during early pregnancy, sometimes called morning sickness, can happen any time of the day.

Morning sickness often begins about the 6th week of pregnancy and gets better by the 13th week. It likely happens because hormone levels in your body change rapidly in early pregnancy. Stress, not eating for several hours or certain odors may trigger morning sickness.

You may worry about the health of your baby if morning sickness is a problem. If you are in good health before pregnancy, your growing baby will have enough nutrients for the first months of pregnancy.

Lalabada iyo Mataga Waqtiga Uurku cusub yahay, waxaa mararka qaar loo yaqaan xanuunka subaxdii, waxa uuna imaan karaa waqtii kasta maalintii.

Xanuunka subaxdii badanaa waxa uu billioowdaa asbuuca 6aad ee uurka waxa uuna soo fiicnaadaa asbuuca 13aad. Waxaa sababaaya isbedelka hoormoonka jirka oo si xawli ah isku bedelaa marka uurku cusub yahay. Walaac, cunto cunid la'aan muddo saacado ah ama qaybo kamid ah urka ayaa kicin kara xanuunka.

Waxaad ka welweli kartaa caafimaadka ilmahaaga haddii xanuunka subaxdii uu yahay dhib jira. Haddii aad dareemaysay caafimaad fiican kahor uurka, cunugaaga koraaya waxa uu haysan doonaa nafaqo ku filan bilaha koowaad ee uurka.

What you can do

- Take more rest periods or naps.
- Keep something in your stomach.
 - Eat crackers, toast or dry cereal before getting out of bed in the morning.
