Savlon[®]

Antiseptic Cream
Cetrimide, Chlorhexidine Digluconate

Do not use if you are allergic to any of the ingredients, especially Chlorhexidine as it may cause allergic reactions. Cetostearyl alcohol may cause local skin reactions. Parahydroxybenzoates may cause allergic reactions (possibly delayed).

Directions: With clean hands gently apply cream to the affected area. Do not use on the eyes or ears.

Reporting of side effects

If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via the Yellow Card Scheme at: www.mhra.gov.uk/yellowcard. By reporting side effects you can help provide more information on the safety of this medicine. **Keep out of the sight and reach of children.**

USE THIS MEDICINE ONLY ON YOUR SKIN

STOP using and seek medical help immediately if you have any of the following very rare allergic reactions: difficulty breathing, swelling of the face, tongue or throat, dizziness, skin irritation or rash. If you experience these or other side effects, stop using and seek medical advice.

Do not store above 25 °C. Use within 12 months of opening. Do not use after the expiry date shown on the end of the tube.

Active ingredients: Cetrimide 0.5% w/w & Chlorhexidine Digluconate 0.1% w/w.

Also contains: Cetostearyl alcohol, liquid paraffin, methylhydroxybenzoate (E218), propylhydroxybenzoate (E216), disodium edetate, perfume & purified water.
