

WAS PORTAL REVAMP UPDATE

We are excited to announce the launch of the new refreshed WAS Portal. Lot of thought had gone into improving the usability and based on various feedback received we have ensured the portal provides information in a more concise manner which users can readily consume. We have ensured that there is no disruption in transition to the new portal and all the functionalities that you are used to is made available in the new portal with enhanced user experience.

Navigation Changes:

The major change you would experience is around the Navigation and how certain information are shown. We have moved away from the classical page view to more contemporary top-down structure with the navigation widgets for different pages available in the left.

Summary Page:

New Summary Page is introduced in the new portal which will give high level overview of all sites configured for scanning under WAS.

	Summary									
Summary	6 11			0			Site Health Summary			
Dashboard	Malware Monitoring	Application Audit		Vulnerability Assessment						
Malware Monitoring	Vulnerabilities Vulnerabilities			(System) Vulnerabilities			100%			
Application Audit										
e Vulnerability	Group Display 5 +						Search by group name			
Assessment	Sr. No. Group Name	Malware Monitoring ↓↑	Application Audit ↓↑	Vulnerability Assessment	Total ↓†	Pass	Status Fail	Unknown		
Reports	1 Presales Group	6	11	0	17	0	1	0	Details	
Setting	« 1 »							Sho	wing 1-1 of 1 groups	

- First section provides you the number of vulnerabilities found across all sites configured. It also shows you the health summary, which would provide immediate information to user if certain sites have failed the health check and immediate action is required.
- Then the Group section will show the various groups that are configured and summary of the particular group. On clicking on details, user will be taken to the dashboard page which is designed to be similar to the existing dashboard page. Customer would get all the widgets which is available in the existing portal here
- Site section will provide information around specific sites.

The other pages widgets and structure are maintained to have less disruption and would be enhanced in future.

The changes would go live by Friday and you will be able to access the new portal using the existing login credentials. As usual our support is available to answer any of your questions at any time.
