

# REPAIR KIT

ORU KAYAK™

# INSTRUCTIONS

This kit is intended for minor damages to the hull/deck. If the damage to your kayak is more extensive, please contact us at [service@orukayak.com](mailto:service@orukayak.com) . For more information see <http://tinyurl.com/Oru-Kayak-Repair-Kit>.

Gorilla  
Glue

small punctures

Adhesive  
plastic  
patch  
+

gashes

Primer

## To repair small punctures

- 1 Screw applicator tip onto tube of glue and remove black cap. Squeeze glue into puncture. When in contact with water, glue will expand to fill channel in corrugated material.

## To repair gashes

- 1 Cut plastic patch so it covers the gash, with a 1/2" border on all sides, and all corners are rounded.

- 2 Follow instructions on tube of primer. Use it to clean the area of the hull/deck that will be covered by the patch.

- 3 Peel off paper backing and apply patch over gash. Use hands to apply strong pressure to patch for 5-10 seconds. Patch can get wet immediately, but will reach maximum strength in 2-3 days.
