

# WithYou

A brand new audio service, supporting isolated patients by collecting friends and family's voice messages and music tracks on a playlist.

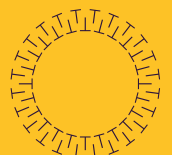

**WithYou** has been created to support NHS staff, patients, and their friends and families by offering a free and easy way to send messages to patients' bedsides.

Families can easily set up an online account, and start collecting music and voice message contributions from friends, which are then sent directly onto the ward.

It reduces pastoral workload for NHS staff, and allows friends and families to create a special experience for their loved one.

**WithYou** is quick to set up, and offered free to NHS trusts. Visit [www.withyou.org.uk](http://www.withyou.org.uk) to learn more.

♥ **WithYou** because no one should feel isolated in their time of need
