# Care instruction

Your Stump Table is made from black-colored or natural MDF, finished with a satin water-based lacquer.

Wood is a natural material, and the colors and tones in the MDF will vary accordingly. The material will age slowly and gracefully, developing a patina over time similar to a fine leather hide.

For the first few weeks after receiving your table, the surface should be allowed to acclimatise to the lighting conditions in the room. During this time, avoid leaving objects on the table for a prolonged period, particularly if in direct sunlight, to allow the full surface to acclimatise evenly.

With proper care, the high quality of Hem furniture can be maintained for years to come. If you want to learn more or have any questions about our care & maintainance recommendations, please write to [info@hem.com](mailto:info@hem.com).
