II. Share issuance offering to existing shareholders

1. Name of securities: Share of Ho Chi Minh City Securities Corporation (HCM)

2. Type of share: Ordinary share
3. Par value: VND10,000/ share (*Ten thousand dong per share*)

9. Issuance rate (*total estimated number of issued shares/ number of outstanding shares*): 66,67%

11. Offering method: In accordance with shareholders' purchasing rights

13. Offering price: VND 14,000/ share (*Fourteen thousand dong per share*)
14. Estimated total value of issuance at offering price: VND 1,209,172,230,000 (*One thousand two hundred-nine billion one hundred seventy-two million two hundred thirty thousand dong*)
15. The right to purchase additional issued shares is transferable only one time.
16. Shareholders restricted in transferability are still entitled to purchase shares. The number of additional shares purchased from the right to purchase shares is not restricted.
17. Processing with arising odd stocks (*if any*): The number of shares existing shareholders receive will be rounded down to the unit. The decimal fraction (*if any*) will be canceled.
 For example: Nguyen Van A owns 154 HCM shares, according to the issuance ratio 3:2, Nguyen Van A will be entitled to the right of purchasing $(154 \times 2) / 3 = 102,7$ additional shares. Thus, Nguyen Van A will be entitled to the right of purchasing 102 shares. Odd share (0.7 shares) will be canceled.
18. Processing with the remaining of shares from existing shareholders that do not carry out the purchasing rights:
 In case of the remaining of shares from existing shareholders that do not carry out the purchasing rights (if any), the General Shareholders' Meeting authorizes to the BoD to decide the following contents:
 - The remaining of shares shall be offered to other investors chosen by the BoD (including investors stipulated in Clause 3 Article 1 of Decree No.60/2015/NĐ-CP dated 26 June 2015) with the offering price not lower than the one offered to existing shareholders.

- In case of the ownership percentage of shareholders whom the BoD continues to distribute offered shares exceeds 25% of the total voting shares, it is not necessary to process a private placement offering.
 - The remaining of shares from existing shareholders offering to other investors shall be restricted one year from the date completing the issuance in accordance with the provisions of law.
 - In case of passing the deadline of distributing shares according to the provisions of law (including the extended time, if any), if there are still any undistributed shares left, they will be cancelled and BoD will announce to end the offering plan.
 - To consider carefully and to adjust the capital using plan to ensure that the Company's capital and business activities are not affected
19. Expected time of issuance: In 2018 or Q12019 after receiving the approval from the State Securities Commission.
20. Capital using plan:
- Total value of expected additional issued shares to existing shareholders VND 1,209,172,230,000 (*One thousand two hundred-nine billion one hundred seventy-two million two hundred thirty thousand dong*). Additional capital gained from the share issuance to existing shareholders will be allocated to:
 - Additional capital for margin lending: VND 400.000.000.000
(*In words: Four hundred billion dong*)
 - Additional capital for underwriting of share issuance: VND 600.000.000.000
(*In words: Six hundred billion dong*)
 - Additional capital for principle investment: VND 209.172.230.000
(*In words: Two hundred-nine billion one hundred seventy-two million two hundred thirty thousand dong*)
 - General Shareholders' Meeting authorize the BoD to adjust the using plan of capital gained from the offering to accord with the Company's actual need of using capital and to ensure the shareholders' maximum benefits and to report to the latest General Shareholders' Meeting.
21. Method of determining offering price:
- Offering price: VND 14,000/ share (*Fourteen thousand dong per share*)
- Based on 1H2018 Audited Financial Statement as at 30 June 2018: Book value of HCM stock is VND 22,654/ share.
 - Based on the price of HCM stock of the closet 60 trading sessions (*form 29 May 2018 to 20 August 2018*): Average ATC price of HCM stock is VND 58,309/ share.
 - Based on the Company's growth strategy and the need of raising charter capital, and simultaneously encouraging shareholders in commitment and contribution to the Company's growth, the offering price shall be lower than the book value by 38.20% and lower than the average market price (*based on the closest 60 trading sessions*) by 75.99%.

22. Expected diluted price:

At the record date of exercising purchasing rights of additional issued shares to existing shareholders, the Company's shares price will be technically adjusted according to this formula:

$$\text{Market price (adjusted)} = \frac{PR (t - 1) + I_1 * PR}{(1 + I_1)}$$

$PR (t - 1)$ is the stock trading price before the closing date of exercising purchasing rights

PR is the price of additional issued shares to existing shareholders

I_1 is the ratio of increased capital

For example: HCM trading price before the record date of exercising purchasing rights is VND 60.000/ share. The price of additional issued shares to existing shareholders is VND 14.000/ share. The ratio of share offering to existing shareholders is 3:2 and the ratio of offering share to increase capital from owner's equity is 3:2. Thus, the adjusted market price will be:

$$\text{Market price (adjusted)} = (60.000 + 2/3 * 14.000 + 2/3 * 0) / (1 + 2/3 + 2/3) = \text{VND } 29.714/ \text{ share}$$

23. General Shareholders' Meeting authorizes the BoD to:

- Select the right time to process the offering plan and the record date for the list of shareholders to the right to purchase shares under the issuance plan to the existing shareholders as soon as possible after receiving Certificate of share issuance offering to the existing shareholders from the State Securities Commission while ensuring the benefits of shareholders in accordance with the provisions of Law.

- Assign the Board of Directors and the Board of Management to amend the Company Charter accordingly in charter capital related articles upon the result of the issuance; execute the registration of increased charter capital to amend Business Registration Certification of HSC at State Securities Commission ("SSC") after completing the issuance.

IV. Assessment of expected EPS dilution

The Company offers additional issued shares to increase the charter capital from VND 1,297,567,580,000 to VND 3,089,726,480,000. In case of successful offering plan, the Company's outstanding shares will be 308,770,058. After the new shares are officially circulated, there will be an EPS dilution as follows:

$$\text{EPS} = (\text{earnings after tax} - \text{preferred shares' dividends}) / (\text{outstanding shares})$$

The EPS dilution level in this offering plan will be assessed as follows:

- The total expected earnings after tax in 2018 is VND 818,717,000,000. The expected average outstanding shares in 2018, without additional issued shares, are 129,562,479. Thus, the expected EPS in 2018 before the offering plan is VND 6.319.
- After the offering plan, the expected outstanding shares will be 308,770,058. Assuming HSC completes the offering plan at the end of October 2018, then the expected average outstanding shares will be 159,513,628 and EPS will decrease and be valued at VND 5.133 per share.

The additional shares offering may also decrease the book value per share (BVPS) when the outstanding shares increase. Then, BVPS will be calculated as follows:

$$\text{BVPS} = \text{owner's equity} / \text{outstanding shares}$$

At the ending date of offering plan, if the growth of owner's equity is lower than the growth of number of shares after the offering plan, the book value per share will decrease.

The BoD would like to submit to General Shareholders' Meeting for your approval.

**ON BEHALF OF THE BOARD OF DIRECTORS
MEMBER**

JOHAN NYVENE

16. Shareholders restricted in transferability are still entitled to purchase shares. The number of additional shares purchased from the right to purchase shares is not restricted.
17. Processing with arising odd stocks (*if any*): The number of shares existing shareholders receive will be rounded down to the unit. The decimal fraction (*if any*) will be canceled.

For example: Nguyen Van A owns 154 HCM shares, according to the issuance ratio 3:2, Nguyen Van A will be entitled to the right of purchasing $(154 \times 2) / 3 = 102,7$ additional shares. Thus, Nguyen

Van A will be entitled to the right of purchasing 102 shares. Odd share (0.7 shares) will be canceled.

18. Processing with the remaining of shares from existing shareholders that do not carry out the purchasing rights:

In case of the remaining of shares from existing shareholders that do not carry out the purchasing rights (if any), the General Shareholders' Meeting authorizes to the BoD to decide the following contents:

- The remaining of shares shall be offered to other investors chosen by the BoD (including investors stipulated in Clause 3 Article 1 of Decree No.60/2015/NĐ-CP dated 26 June 2015) with the offering price not lower than the one offered to existing shareholders.
- In case of the ownership percentage of shareholders whom the BoD continues to distribute offered shares exceeds 25% of the total voting shares, it is not necessary to process a private placement offering.
- The remaining of shares from existing shareholders offering to other investors shall be restricted one year from the date completing the issuance in accordance with the provisions of law.
- In case of passing the deadline of distributing shares according to the provisions of law (including the extended time, if any), if there are still any undistributed shares left, they will be cancelled and BoD will announce to end the offering plan.
- To consider carefully and to adjust the capital using plan to ensure that the Company's capital and business activities are not affected

19. Expected time of issuance: In 2018 or Q12019 after receiving the approval from the State Securities Commission.

20. Capital using plan:

- Total value of expected additional issued shares to existing shareholders VND 1,209,172,230,000 (*One thousand two hundred-nine billion one hundred seventy-two million two hundred thirty thousand dong*). Additional capital gained from the share issuance to existing shareholders will be allocated to:
 - Additional capital for margin lending: VND 400.000.000.000
(*In words: Four hundred billion dong*)
 - Additional capital for underwriting of share issuance: VND 600.000.000.000
(*In words: Six hundred billion dong*)
 - Additional capital for principle investment: VND 209.172.230.000
(*In words: Two hundred-nine billion one hundred seventy-two million two hundred thirty thousand dong*)
- General Shareholders' Meeting authorize the BoD to adjust the using plan of capital gained from the offering to accord with the Company's actual need of using capital and to ensure the shareholders' maximum benefits and to report to the latest General Shareholders' Meeting.

21. Method of determining offering price:

Offering price: VND 14,000/ share (*Fourteen thousand dong per share*)

- Based on 1H2018 Audited Financial Statement as at 30 June 2018: Book value of HCM stock is VND 22,654/ share.
- Based on the price of HCM stock of the closet 60 trading sessions (*form 29 May 2018 to 20 August 2018*): Average ATC price of HCM stock is VND 58,309/ share.
- Based on the Company's growth strategy and the need of raising charter capital, and simultaneously encouraging shareholders in commitment and contribution to the Company's growth, the offering price shall be lower than the book value by 38.20% and lower than the average market price (*based on the closest 60 trading sessions*) by 75.99%.

22. Expected diluted price:

At the record date of exercising purchasing rights of additional issued shares to existing shareholders, the Company's shares price will be technically adjusted according to this formula:

$$\text{Market price (adjusted)} = \frac{PR(t-1) + I_1 * PR}{(1 + I_1)}$$

$PR(t-1)$ is the stock trading price before the closing date of exercising purchasing rights

PR is the price of additional issued shares to existing shareholders

I_1 is the ratio of increased capital

For example: HCM trading price before the record date of exercising purchasing rights is VND 60.000/ share. The price of additional issued shares to existing shareholders is VND 14.000/ share. The ratio of share offering to existing shareholders is 3:2 and the ratio of offering share to increase capital from owner's equity is 3:2. Thus, the adjusted market price will be:

$$\text{Market price (adjusted)} = (60.000 + 2/3 * 14.000 + 2/3 * 0) / (1 + 2/3 + 2/3) = \text{VND } 29.714/ \text{ share}$$

23. General Shareholders' Meeting authorizes the BoD to:

- Select the right time to process the offering plan and the record date for the list of shareholders to the right to purchase shares under the issuance plan to the existing shareholders as soon as possible after receiving Certificate of share issuance offering to the existing shareholders from the State Securities Commission while ensuring the benefits of shareholders in accordance with the provisions of Law.
- Conduct necessary procedures to process and to complete the share issuance plan to existing shareholders in accordance with regulations of the Company Charter and the documents guiding the implementation of Law, including the approval of the document of share issuance submitted to authorized Government agencies;

- Register and list all of issued shares to existing shareholders at Vietnam Securities Depository ("VSD") and Ho Chi Minh Stock Exchange ("HOSE") after completing the issuance;
- Assign the Board of Directors and the Board of Management to amend the Company Charter accordingly in charter capital related articles upon the result of the issuance; execute the registration of increased charter capital to amend Business Registration Certification of HSC at State Securities Commission ("SSC") after completing the issuance.

❖ **Assessment of expected EPS dilution**

The Company offers additional issued shares to increase the charter capital from VND 1,297,567,580,000 to VND 3,089,726,480,000. In case of successful offering plan, the Company's outstanding shares will be 308,770,058. After the new shares are officially circulated, there will be an EPS dilution as follows:

$$\text{EPS} = (\text{earnings after tax} - \text{preferred shares' dividends}) / (\text{outstanding shares})$$

The EPS dilution level in this offering plan will be assessed as follows:

- The total expected earnings after tax in 2018 is VND 818,717,000,000. The expected average outstanding shares in 2018, without additional issued shares, are 129,562,479. Thus, the expected EPS in 2018 before the offering plan is VND 6.319.
- After the offering plan, the expected outstanding shares will be 308,770,058. Assuming HSC completes the offering plan at the end of October 2018, then the expected average

outstanding shares will be 159,513,628 and EPS will decrease and be valued at VND 5.133 per share.

The additional shares offering may also decrease the book value per share (BVPS) when the outstanding shares increase. Then, BVPS will be calculated as follows:

$$\text{BVPS} = \text{owner's equity} / \text{outstanding shares}$$

At the ending date of offering plan, if the growth of owner's equity is lower than the growth of number of shares after the offering plan, the book value per share will decrease.
