

Warehouse Manager

We are looking for a Warehouse Manager to join our busy Warehouse Department

Purpose of the role - This is a newly created role within the continually growing Company. It's very exciting opportunity for an experienced Warehouse Manager who has previously set-up new warehouse systems, has organised a fast-paced environment and streamlined all process to be extremely efficient.

Main duties & responsibilities

- Review and assess current warehouse processes; design and implement appropriate practices and procedures to optimise workflow and maximise potential revenue.
- Lead, mentor and motivate the team to achieve maximum productivity and engagement whilst gaining buy-in to change.
- Ensure adherence to all health and safety policies.
- Set strategic goals for operational efficiency and increased productivity for the warehouse & line-feeding team.
- Own workforce planning and budgeting to ensure that the warehouse organization is optimally staffed at all times.
- Identify areas of risk (reputational, operational, environmental, quality and safety) and steer the situation to the most advantageous and practical solution.
- Oversee the management of physical stocks and recommend appropriate continuous improvement methods to maximise warehouse layout and method of operation.
- Assist Planning and Purchasing Team to strengthen stock accuracy.
- Feedback frequently to the Senior Leadership Team on performance, efficiencies, goals and challenges.
- Work in close collaboration with Operations Team & transport partners to implement best practices and regular project updates

Person specification

- Significant experience in a Warehouse Manager role, or similar, within a fast-paced and dynamic business
- Demonstrable experience of the successful implementation of continuous improvement initiatives within a warehouse environment
- Significant team leadership experience
- Working experience of quality, health and safety management in different operational environments
- Working knowledge of data analytics and reporting
- Familiarity with business functions including HR, Finance, Supply Chain and IT
- A continuous improvement qualification (Lean, Kaizen or similar) is considered desirable but not essential.
