11th May 2026

Dear Parents/Guardians,

I am pleased to share an important update regarding our school administration system. After careful consideration, all post primary schools in the DDLETB network have decided to transition from our current system, VSware, to a more advanced and user-friendly platform called tyro. Tyro has been selected as the new Management Information System (MIS) for our school, replacing VSware.

We are now entering the planning phase of this transition. As this is a significant change, the migration will take place in a carefully managed and phased manner to ensure minimal disruption for students, parents/guardians, and staff.

We are now entering the planning phase of this transition. As this is a significant change, the migration will take place in a carefully managed and phased manner to ensure minimal disruption for students, parents/guardians, and staff. This migration process will be completed by 31st May 2026.

We are very positive about this move, as tyro is a modern, intuitive, and user-friendly platform that will enhance communication and provide an improved experience for all users.

Importantly, the data currently held on VSware will automatically transfer to tyro during the migration process, ensuring continuity of information.

As part of this process, you will also receive a separate communication tomorrow, containing a link to capture and confirm both parents'/guardians' email addresses to ensure all relevant contacts are correctly set up on the new system.

In the coming weeks, you will receive an email from tyro containing a link to create your account password, along with guidance on how to navigate and use the new system. Training and support will also be available throughout the transition process via tyro, and any issues that arise will be fully supported.

We appreciate your understanding and cooperation as we move to this new platform and look forward to the benefits tyro will bring to our school community.

Kind regards,

John Paul Reilly
