The following is taken from the HSE website

Why Children Should Get The Nasal Flu Vaccine

This flu season, all children age 2 to 17 will be offered the nasal flu vaccine. The Flu Vaccine helps to protect children against Flu. Most Children who get the flu have mild symptoms, but children and young people with long-term health conditions are at risk of serious complications from Flu.

In some children, Flu can lead to problems such as:

- Pneumonia
- Bronchitis
- Inflammation of the Brain (Encephalitis)
- Children with flu may need treatment. Some may need to stay in intensive care. In the past 10 years in Ireland, almost 5,000 children were admitted to hospital with complications of Flu. Almost 200 children had treatment in intensive care and 40 children died.
