

Who Am I?

Famous Scientist Edition

Number 1

Clue 1: I was born in England in 1809

Clue 2: I spent almost 5 years travelling around the world on a ship called HMS Beagle

Clue 3: During my journey, I collected thousands of plant, animal and fossil samples

Clue 4: I developed an idea that explained how species change over time

Clue 5: My ideas were published in a famous book called *On the Origin of Species*

Clue 6: My work helped form the basis of modern Biology

Who am I? _____

Number 3

Clue 1: I was born in England in 1643

Clue 2: As a child, I enjoyed building mechanical devices

Clue 3: I studied light, colour and motion.

Clue 4: I developed laws that explain how objects move

Clue 5: I also helped develop the mathematics needed to study change

Clue 6: An apple is often linked with the story of one of my discoveries

Who am I? _____

Name: _____

Number 2

Clue 1: I was born in London in 1920

Clue 2: I studied chemistry and became interested in understanding molecules

Clue 3: I used X-ray images to study the structure of biological molecules

Clue 4: My work helped scientists understand the structure of DNA

Clue 5: My famous "Photo 51" provided important evidence about DNA

Clue 6: My research contributed to one of the greatest discoveries in Biology

Who am I? _____

Number 4

Clue 1: I was born in Poland in 1867 and later moved to France

Clue 2: I was one of the first people to study radioactivity

Clue 3: I worked alongside my husband Pierre, who was also a scientist

Clue 4: I discovered two new elements: polonium and radium

Clue 5: I was the first woman to win a Nobel Prize

Clue 6: I am also the only person to win Nobel Prizes in two different sciences

Who am I? _____

Class: _____
